WAIT!

**WHERE'S WINSTON?**

St. Elizabeth Healthcare strives to be a strong community partner for the region we serve. Our goal is to lay the educational framework to get young minds excited about the opportunities in a healthcare career. We encourage our educators to use this book to facilitate discussion about the endless possibilities!

Say “Hi” to Winston! Winston is a little messy.  
And he can be a little pesky. But he always means well.  
His family loves him. And Winston loves them!

Meet Winston's family.  
Jade, Dad, Mom, Grandma and James

# CHAPTER 1

Oh, no! Grandma slips on Winston's water!

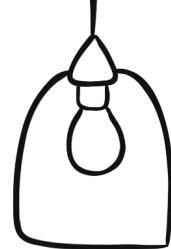

When Winston gets thirsty, watch out! He runs to his water bowl and starts slurping and glugging and splashing water everywhere. Winston always makes a mess!

Mom usually cleans up the water, but she's gone to the store.

So when Grandma comes into the kitchen ... OH NO!

She slips on the water and almost falls to the floor.

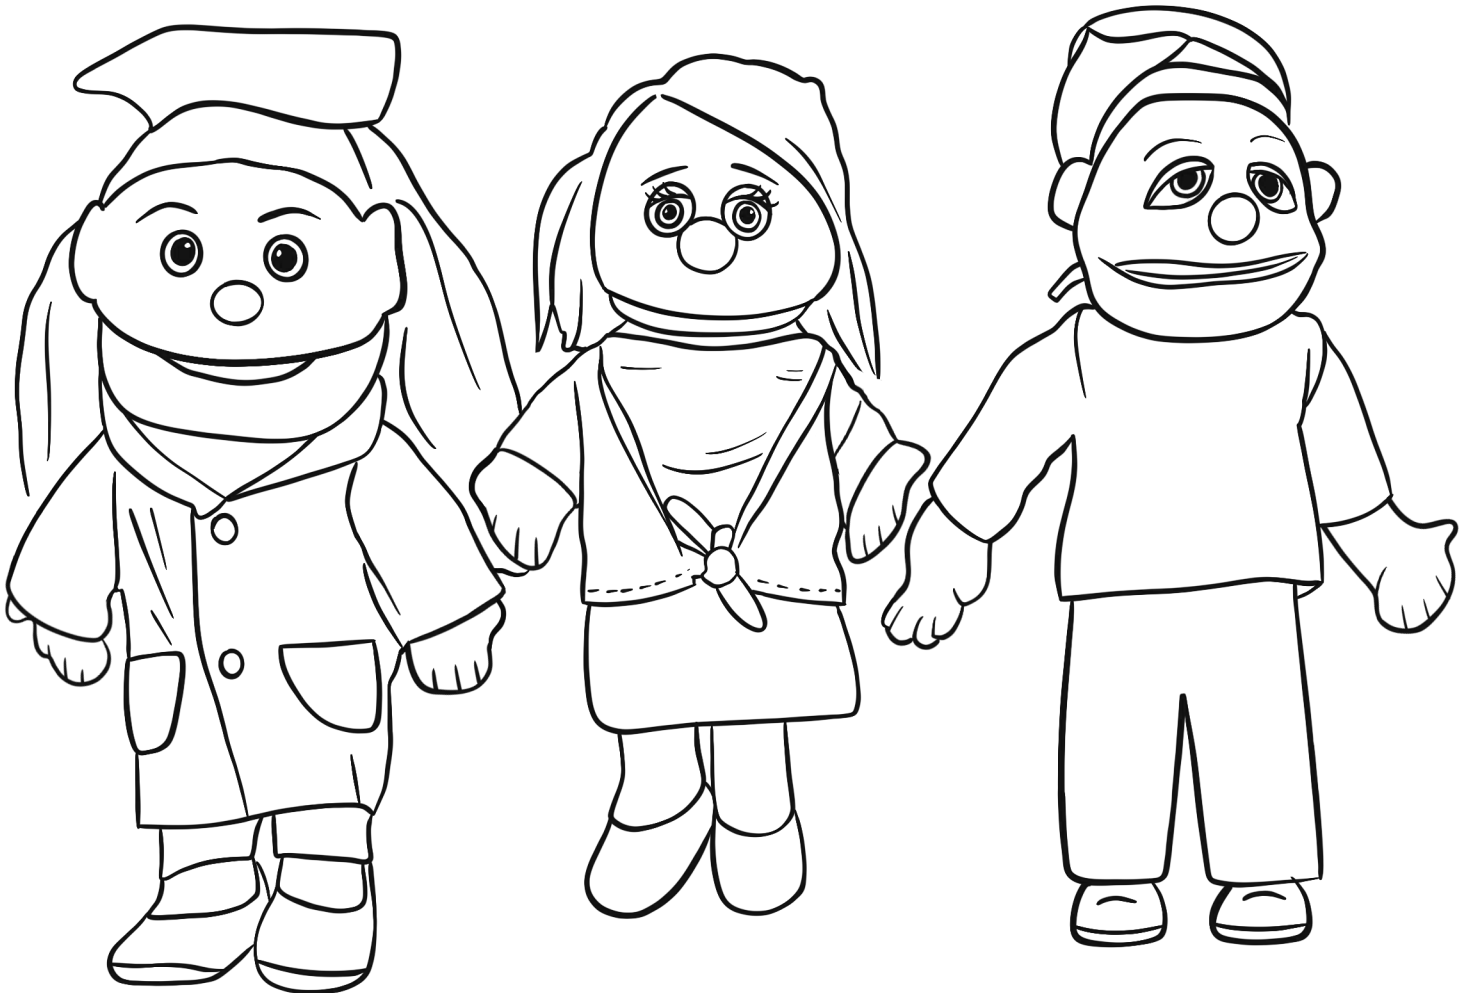

Grandma hurt her wrist when she stopped herself from falling.

Dad takes Grandma to St. Elizabeth Urgent Care.

That's where a team of people will learn where  
Grandma is hurting and how they can help her feel better.

This is the team that helps patients like Grandma at the urgent care.

### **NURSE**

- Gets the patient's health information.
- Checks vital signs like blood pressure, pulse and temperature.

### **PHYSICIAN ASSISTANT**

- Asks patients where their body hurts.
- Decides on the best treatment.

### **RADIOGRAPHER**

- Performs X-rays on patients to see why they're in pain.

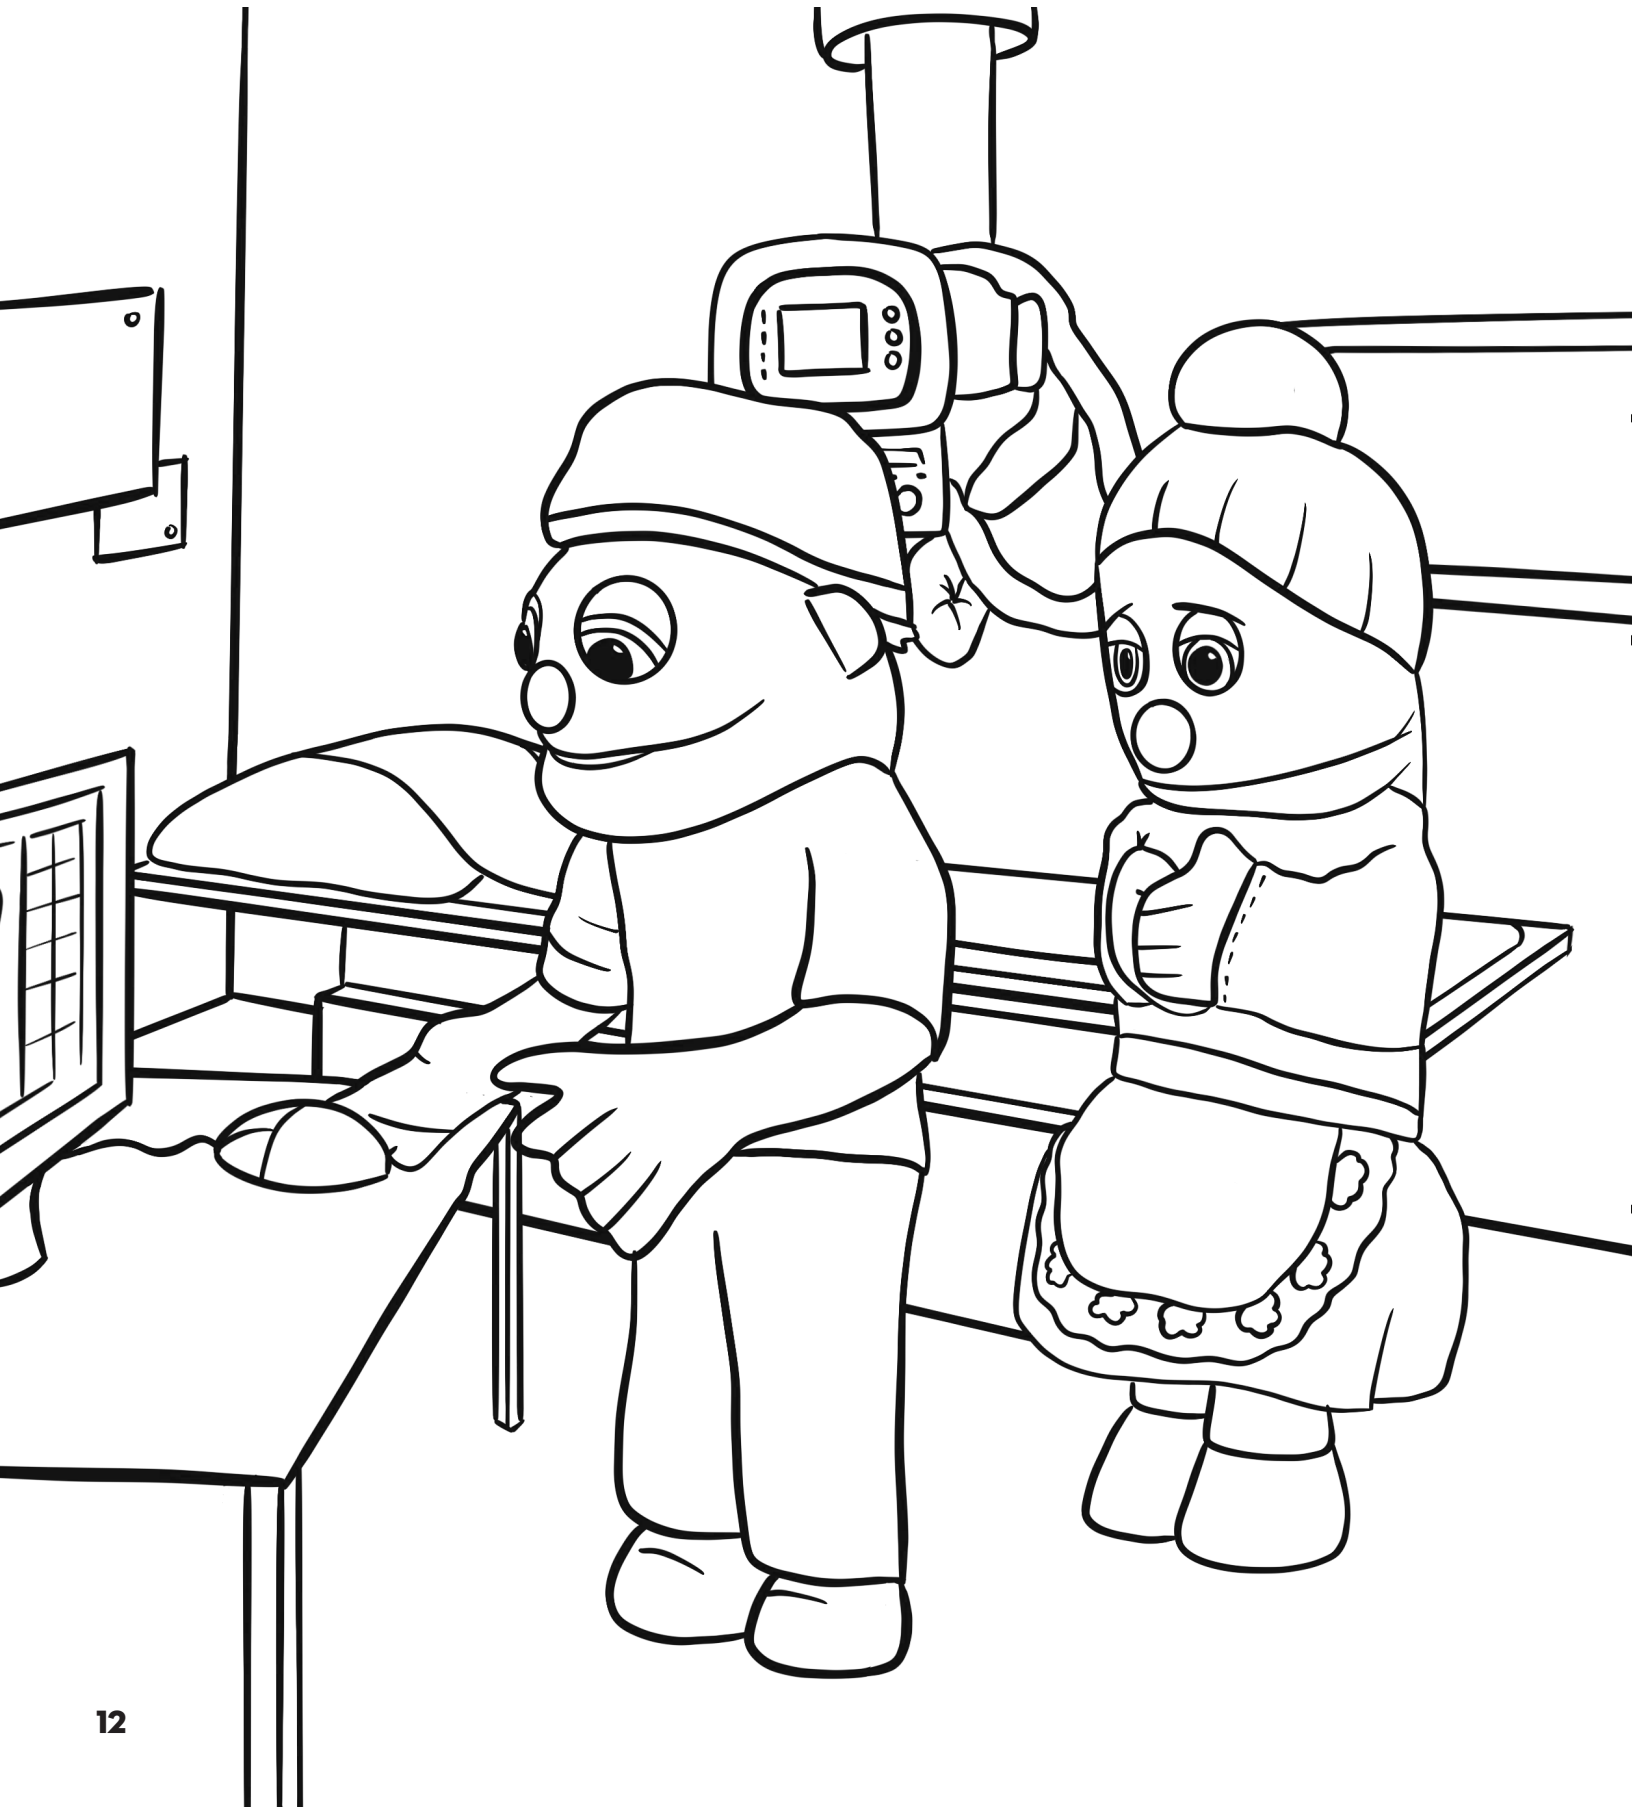

At the urgent care, the nurse checks Grandma's vital signs.

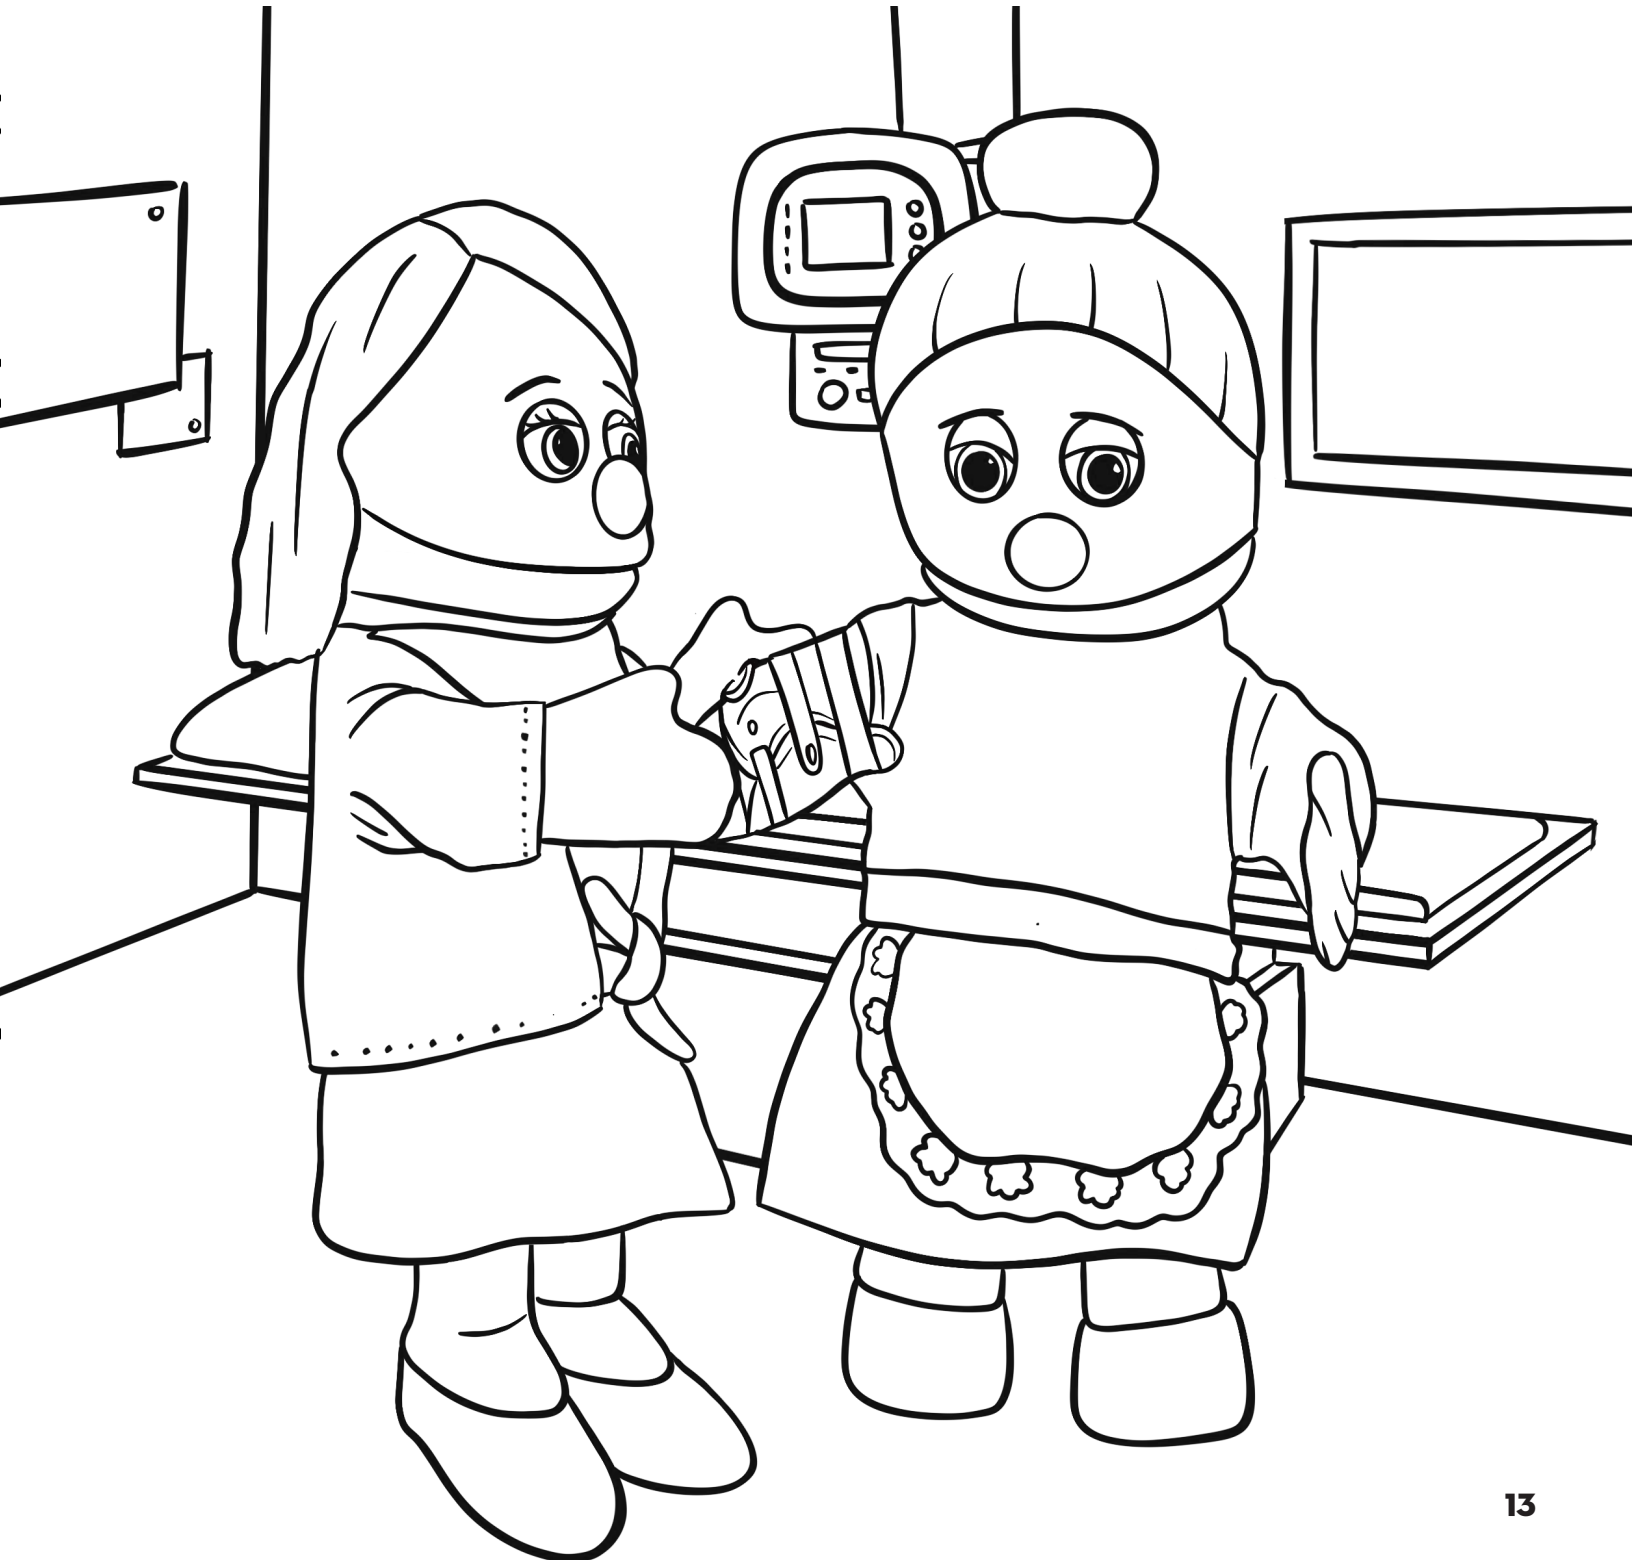

Then she gets an X-ray by the radiographer.

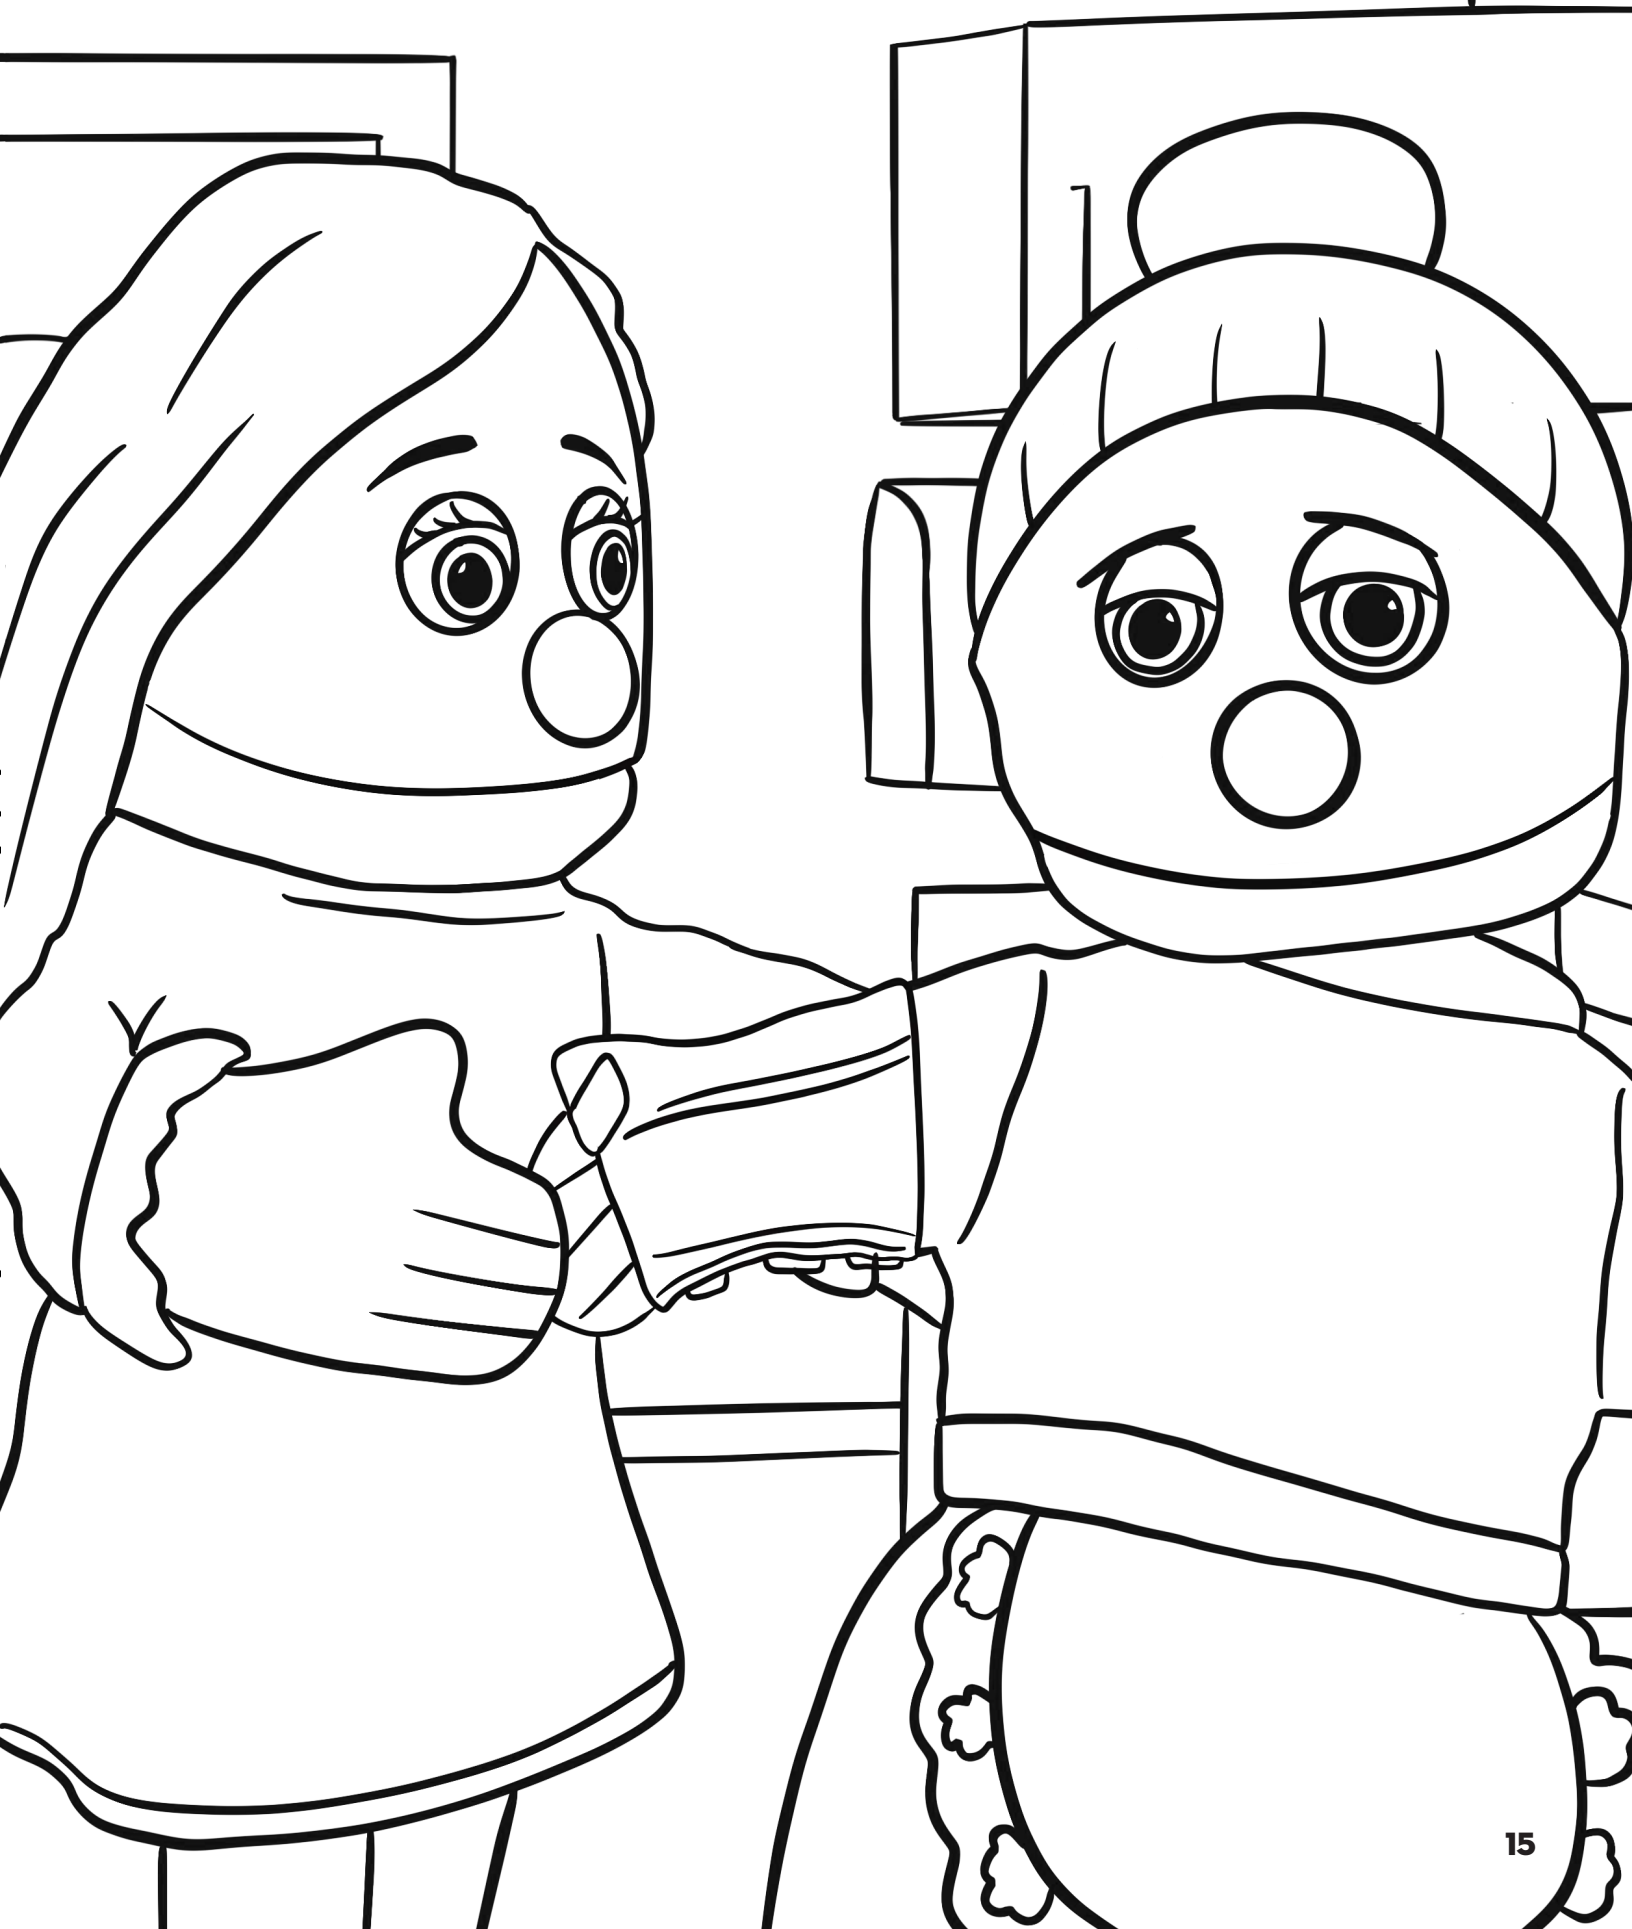

The physician assistant tells her that she sprained her wrist.  
She puts Grandma's wrist in an air cast, which is only worn for a short time.  
But Grandma may need to wear a different cast for a longer time.  
The physician assistant says Grandma should see  
a special doctor who will decide if she needs a hard cast.  
This doctor is called an orthopedic doctor.

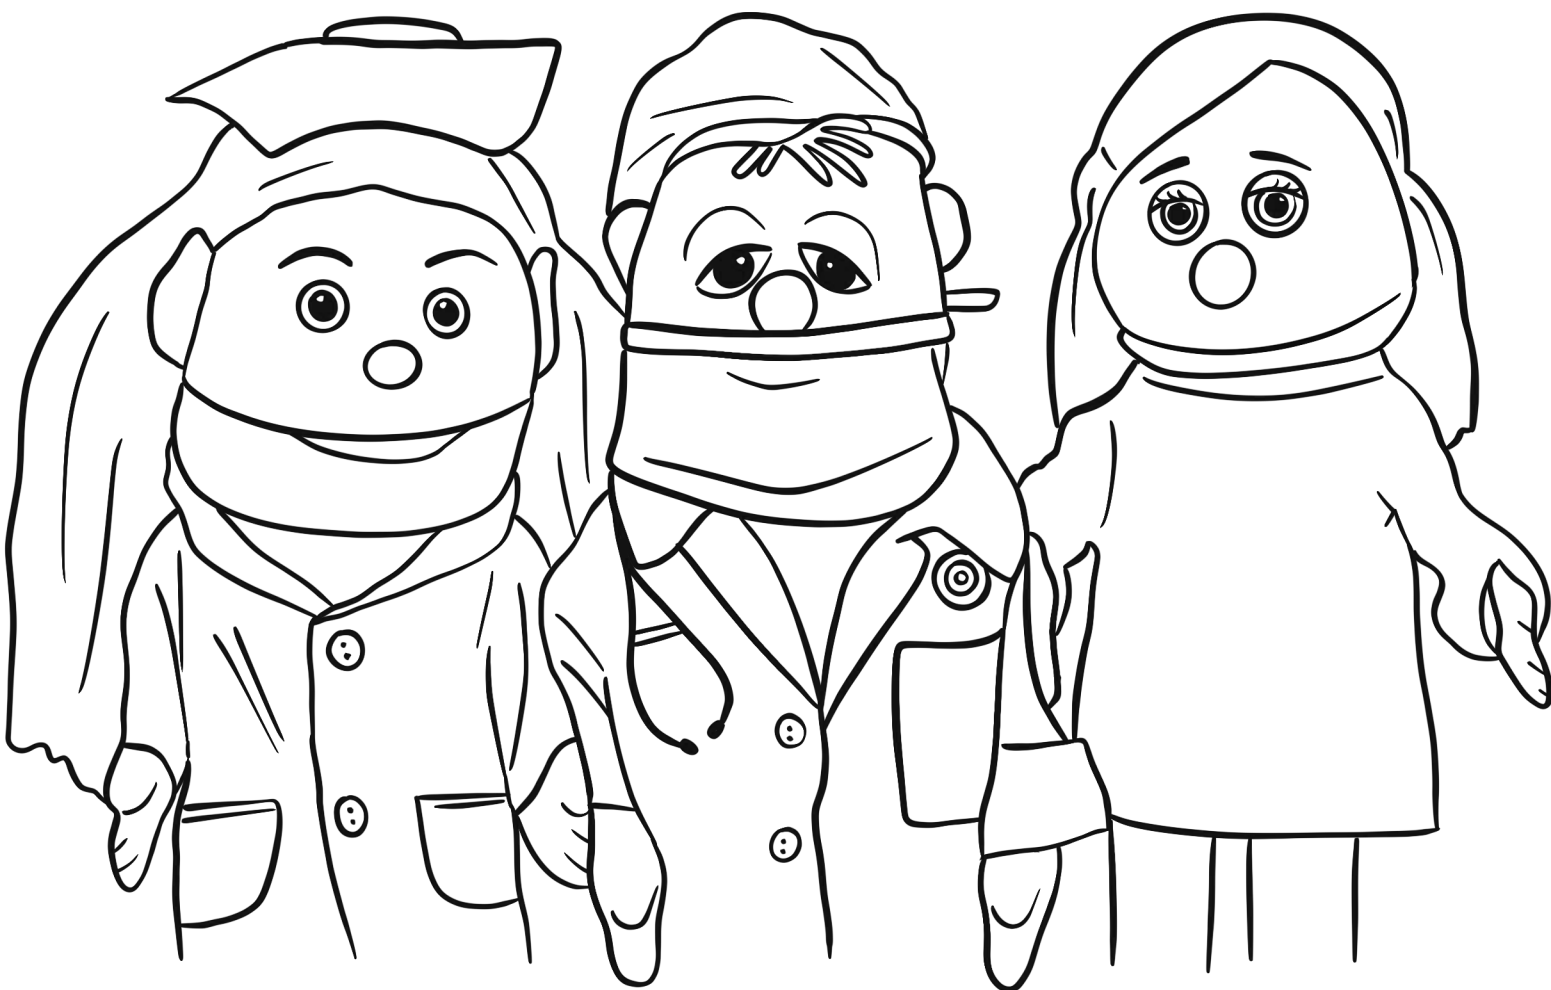

The next day, Grandma visits the orthopedic doctor.  
The doctor gives Grandma good news: Her wrist just has a small sprain.

A physical therapist wraps her hand and wrist and puts on a splint.

This is the team that helps patients like Grandma at the orthopedic doctor's office.

### **NURSE**

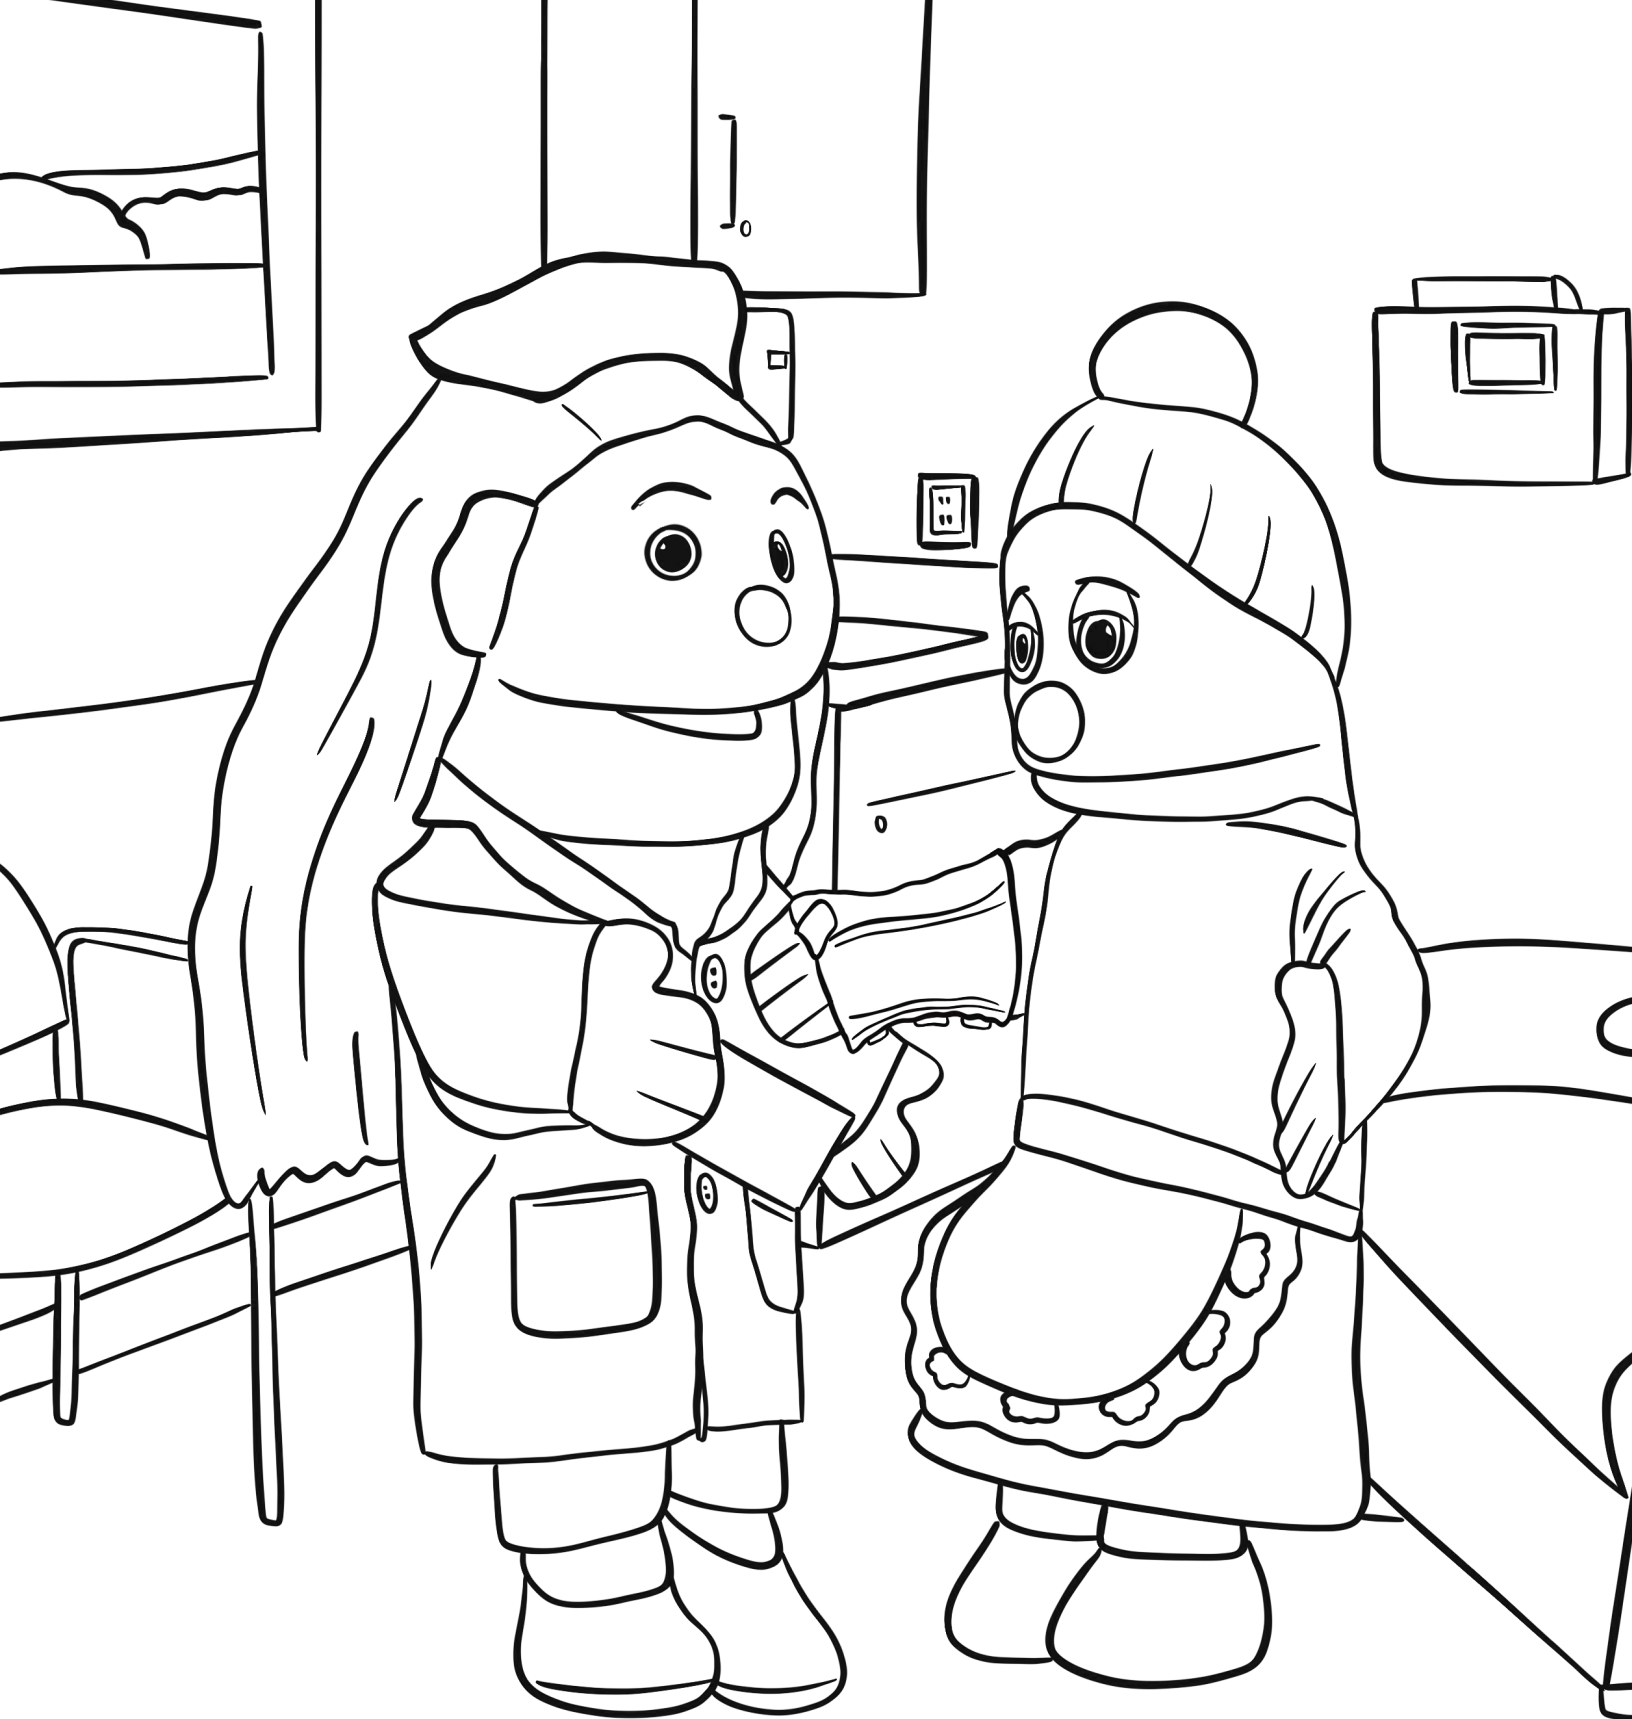

- Gives patients instructions for how to care for themselves at home.

### **ORTHOPEDIC DOCTOR**

- Knows all about bones, joints and muscles that help people move.

### **PHYSICAL THERAPIST**

- Helps people move better and manage their pain.

Next, the nurse gives Grandma the doctor's instructions.

Grandma needs to rest her wrist, put ice on it  
and raise it above the level of her heart as often as she can.

Grandma goes back home, and her family is happy to know she will be fine.

Grandma does what the doctor says and ices her wrist at home.

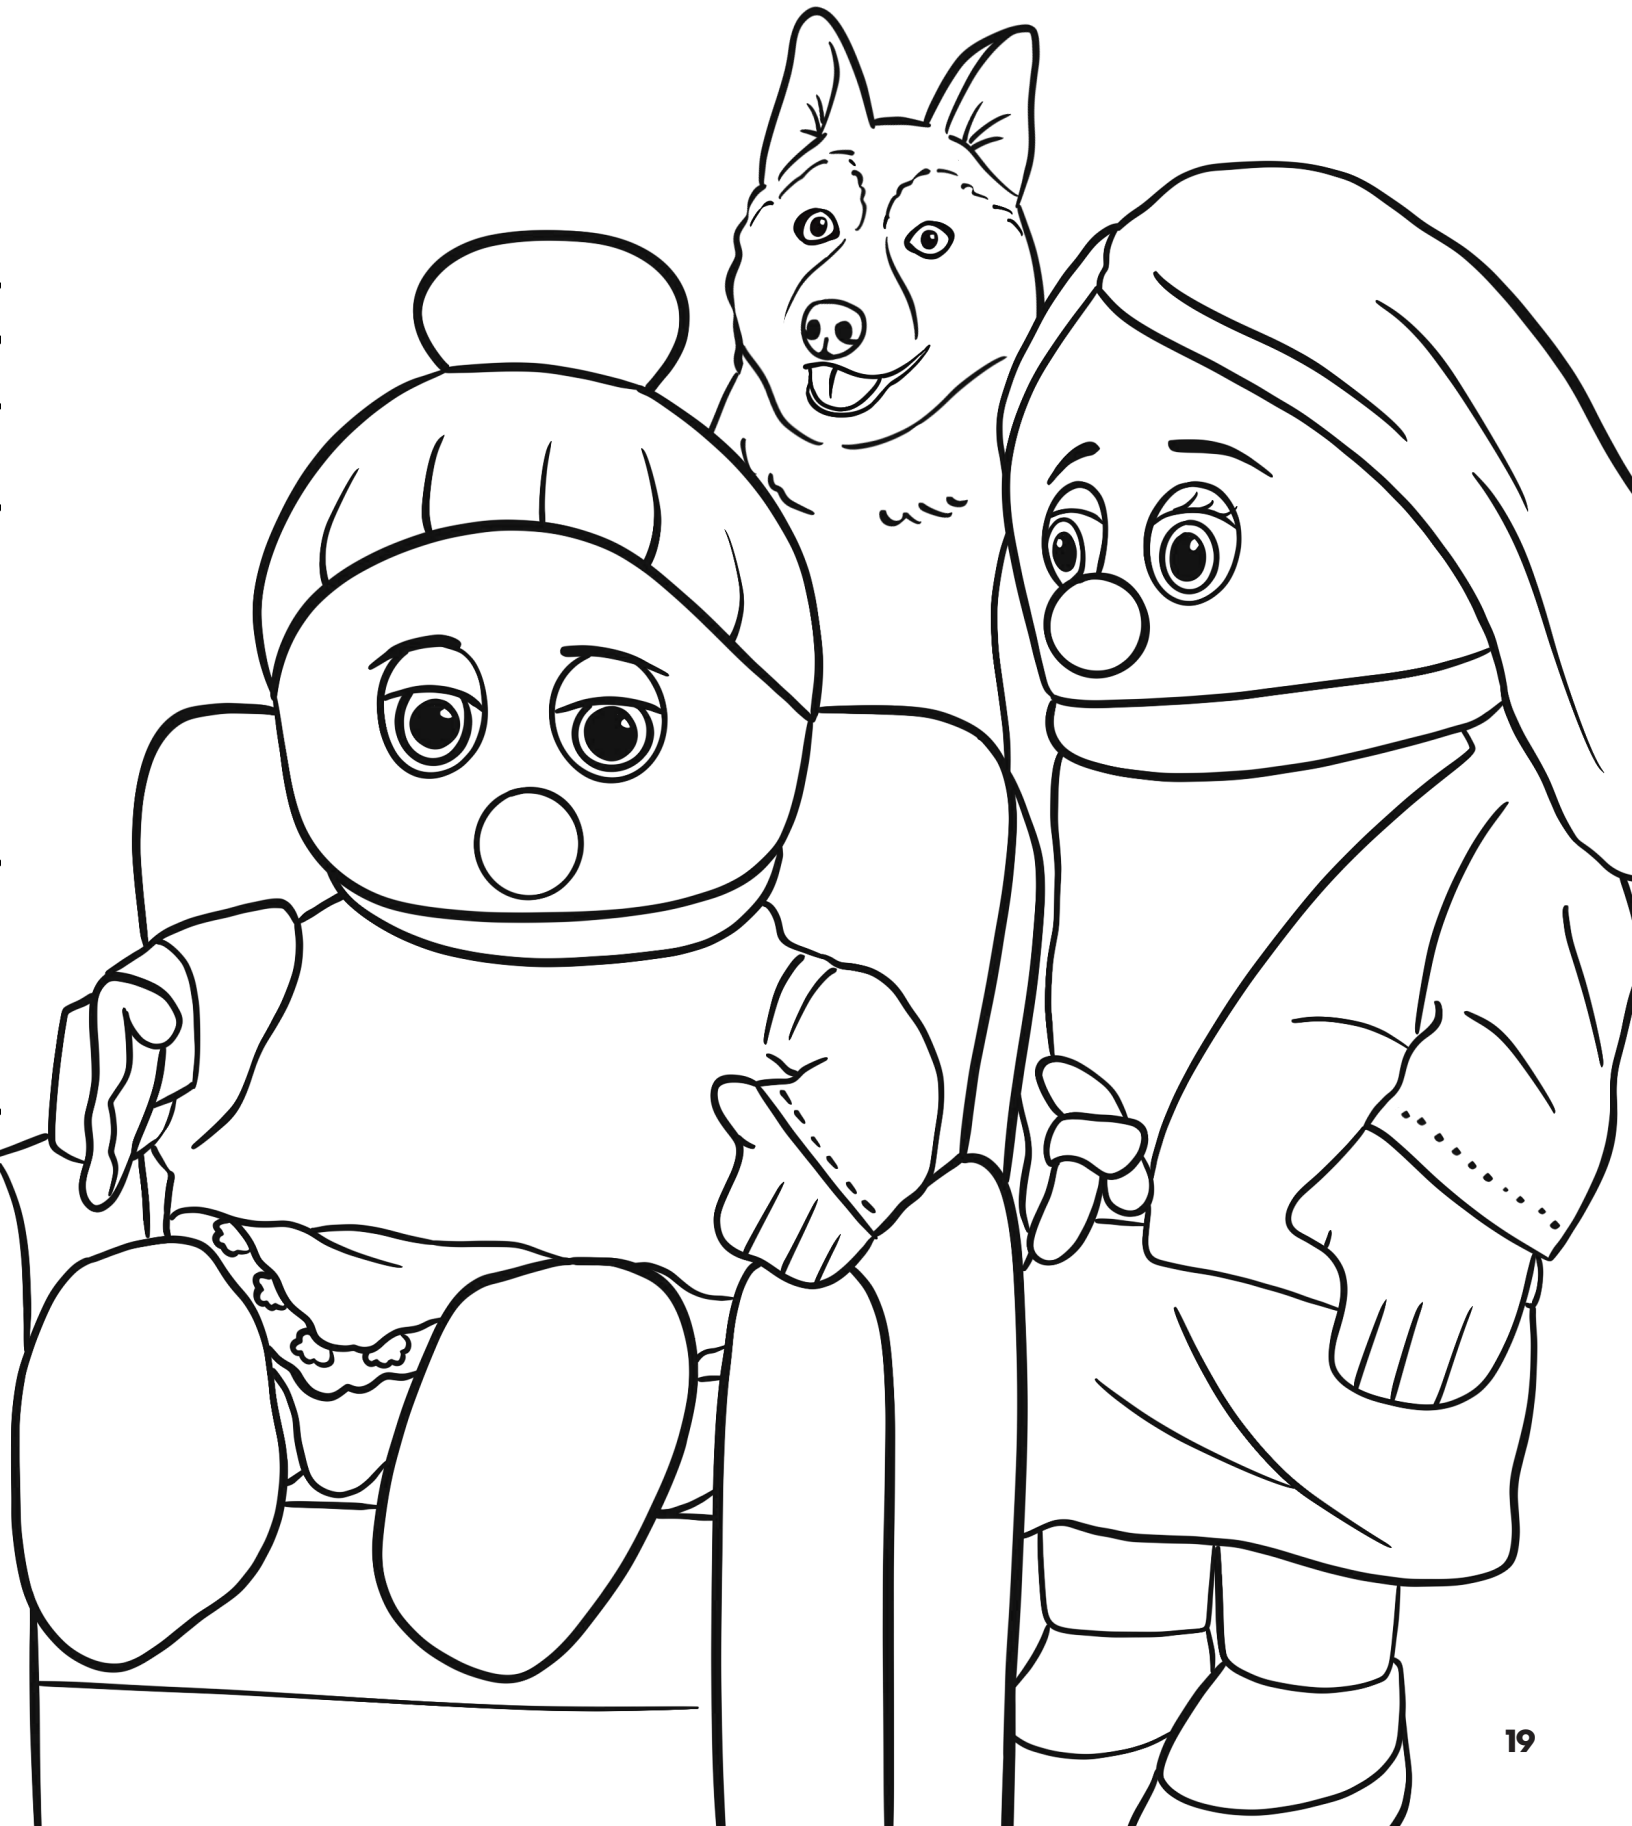

Dad says, “Grandma got a lot of help at urgent care and the orthopedic doctor’s office.”

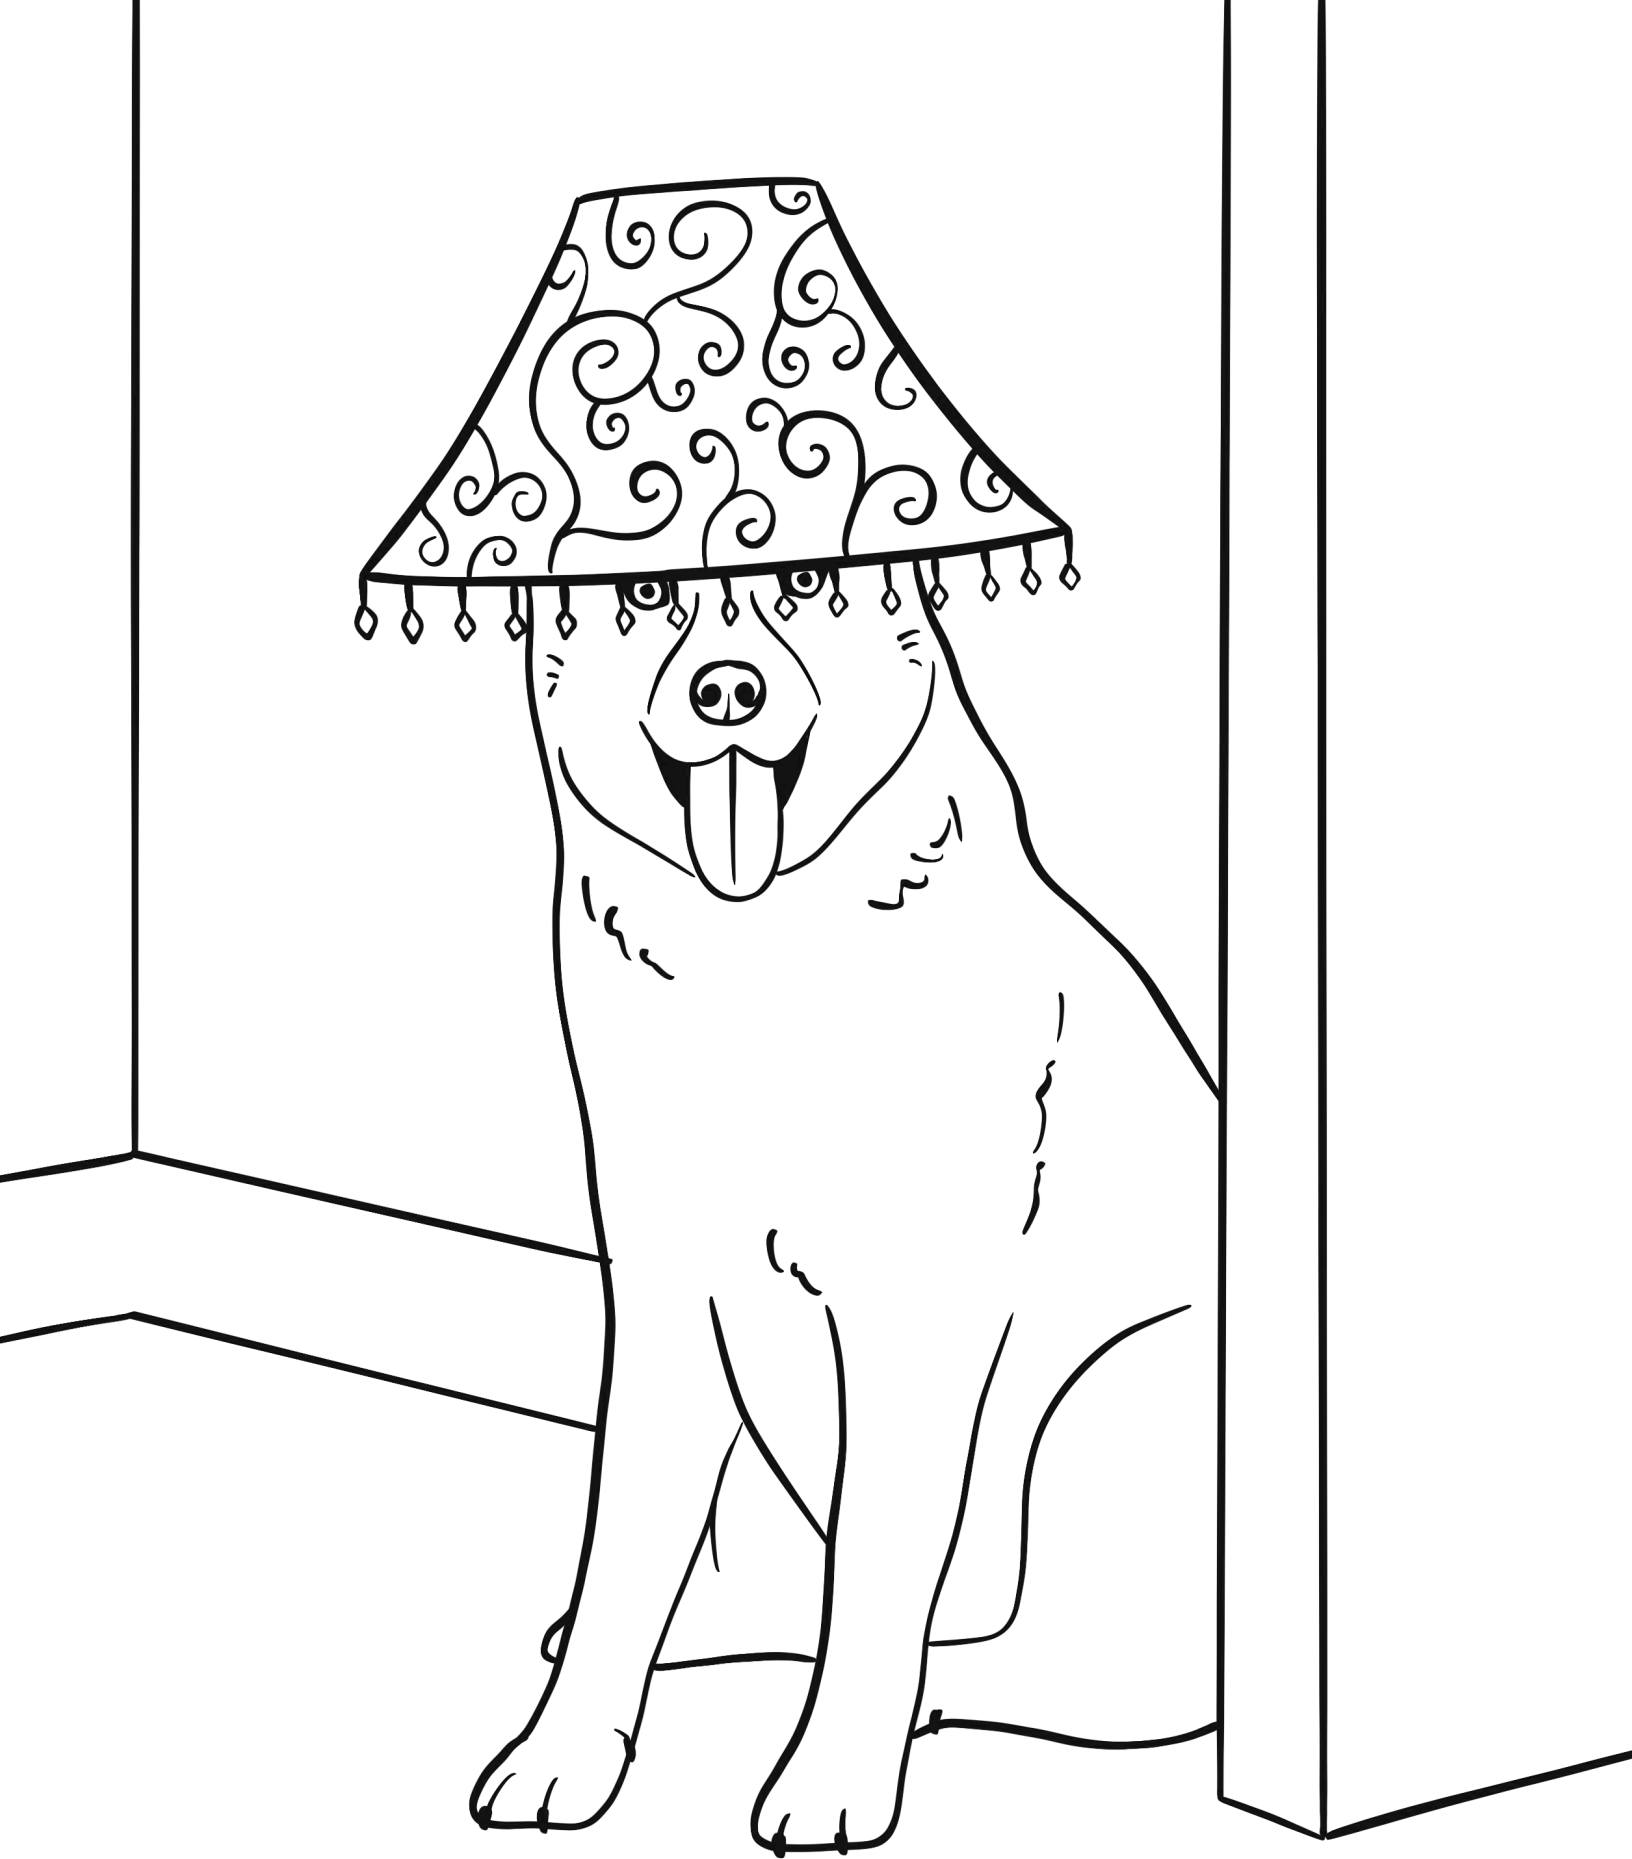

“Yes, and they gave me some souvenirs to give you kids too,” Grandma says,

James loves the St. Elizabeth **baseball** cap and  
Jade checks her heartbeat with the **stethoscope**.

Mom says, "I'm so sorry you slipped on the water!" Grandma smiles and says, "It's that rascal, Winston. He makes a big mess when he drinks his water!"  
She says with a chuckle, "Come here, Winston! I'm going to give you a piece of my mind."

**WAIT! WHERE'S WINSTON?**

## CHAPTER 2

Oh, no! James chases Winston and gets stung by a bee!

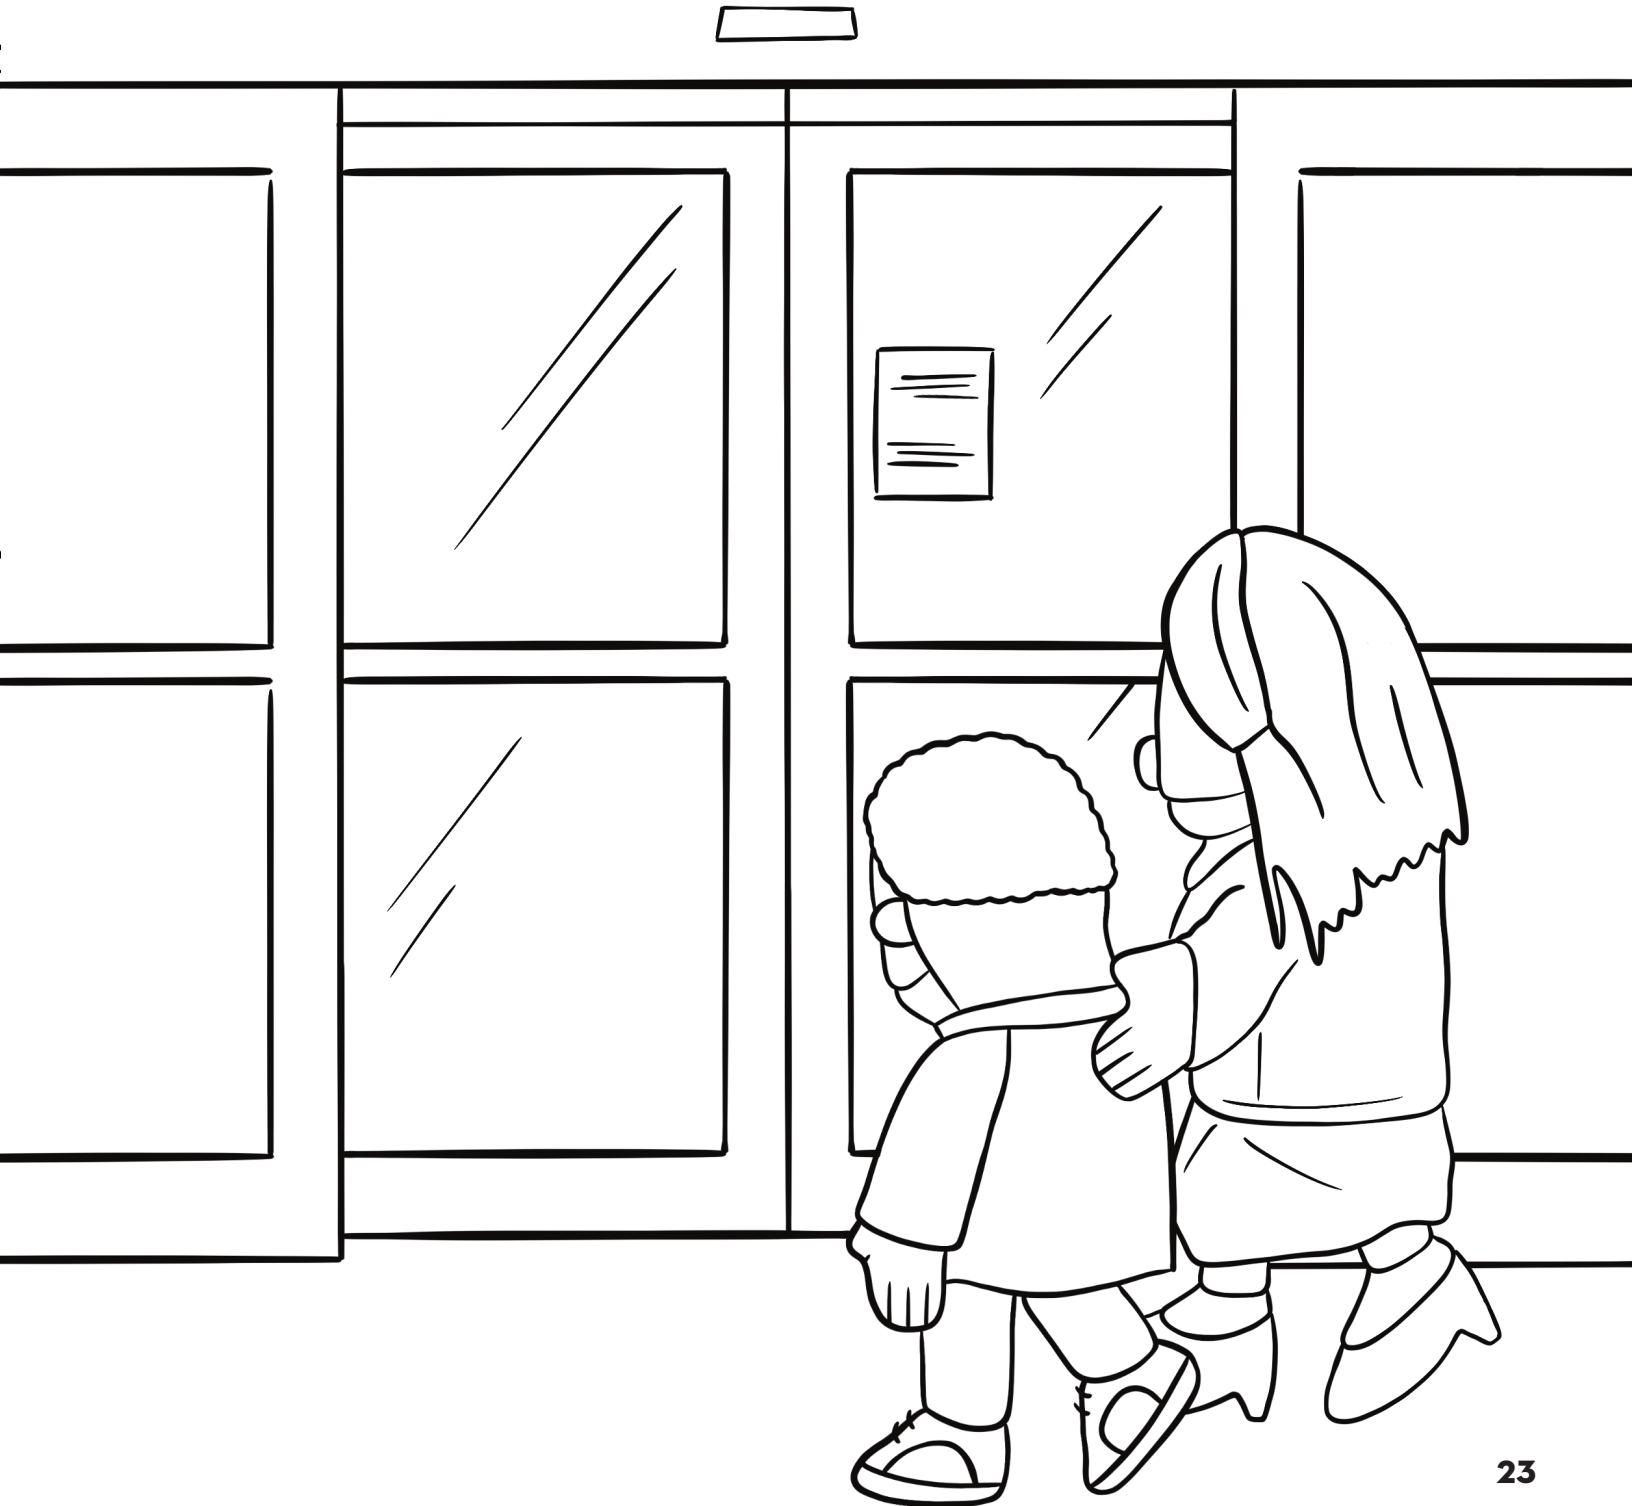

When Winston sees the front door open, watch out!  
He starts jumping and barking and knocking  
everything out of the way.  
Winston always makes a run for it!

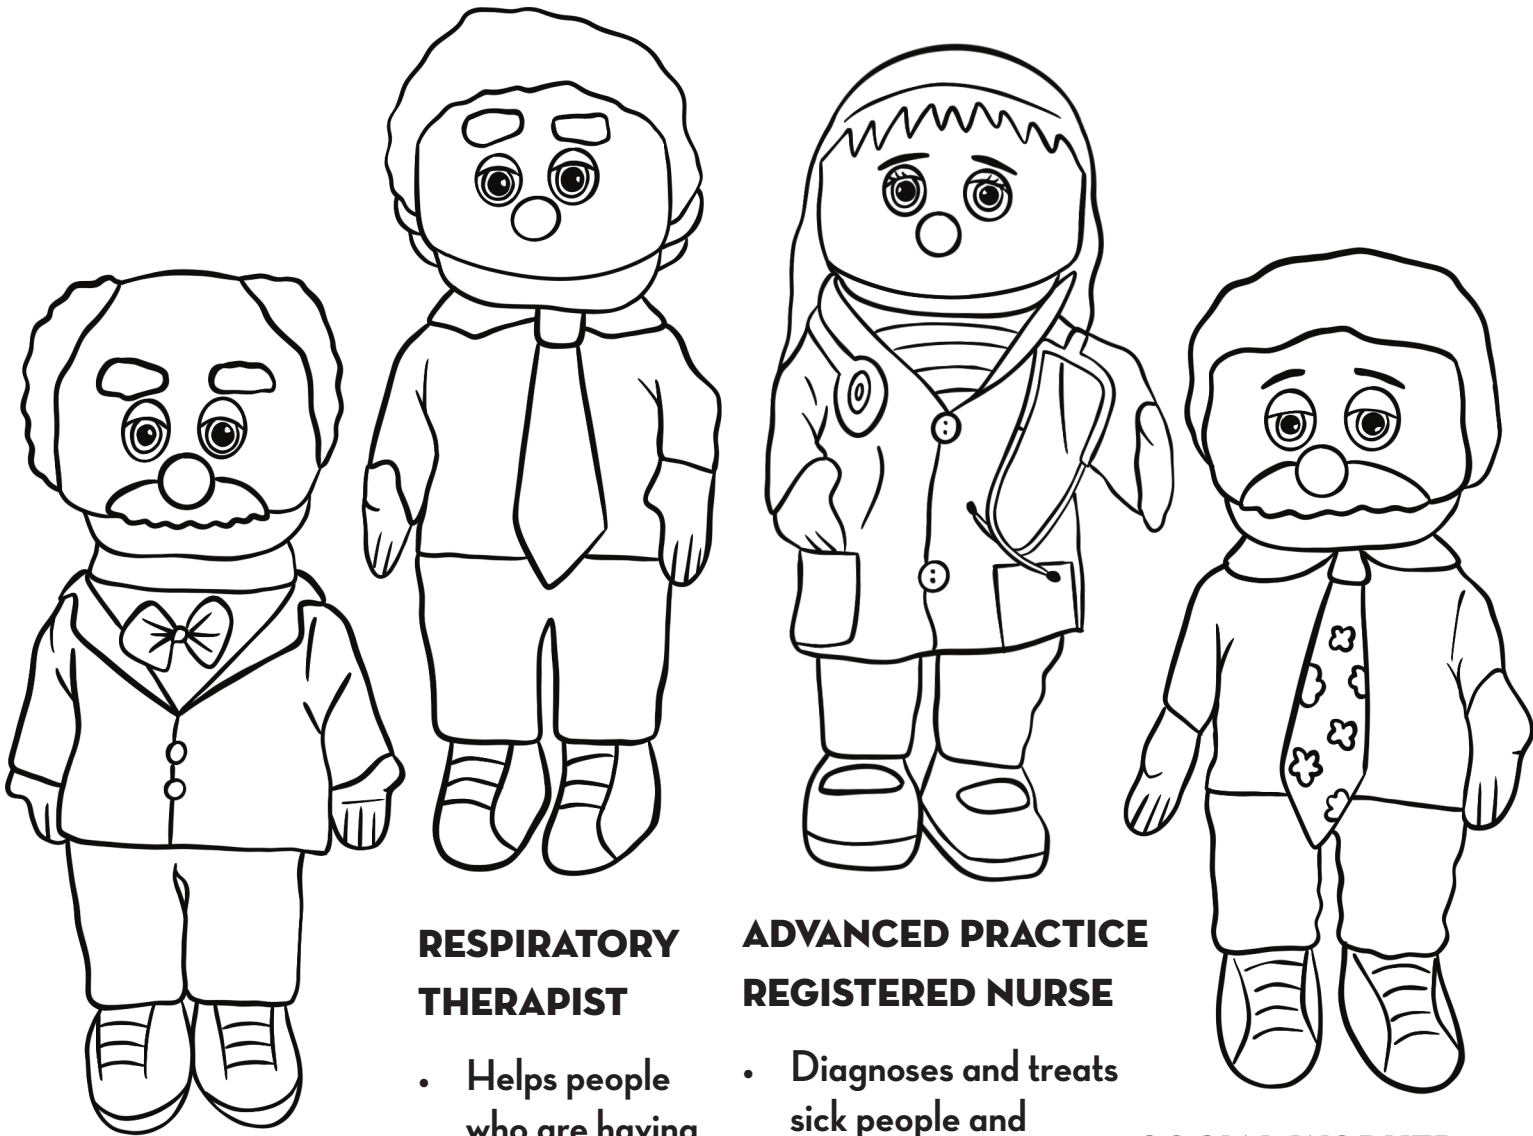

James comes through the door after school and tries to shut it tight.  
But this time Winston is too fast for him and zooms outside.  
James runs after him and accidentally steps on a bee mound ... OH NO!  
He gets chased and stung by an angry bee.

When Mom sees James's puffy face  
she takes him to the St. Elizabeth emergency room right away.  
That's where a team of people will decide how to help James  
with his allergic reaction and how to keep it from happening again.

# EMERGENCY ROOM

This is the team that helps patients like James in the emergency room.

### **PHARMACIST**

- Prepares and provides medicines to patients.
- Explains how to use medicines.

### **RESPIRATORY THERAPIST**

- Helps people who are having trouble breathing.

### **ADVANCED PRACTICE REGISTERED NURSE**

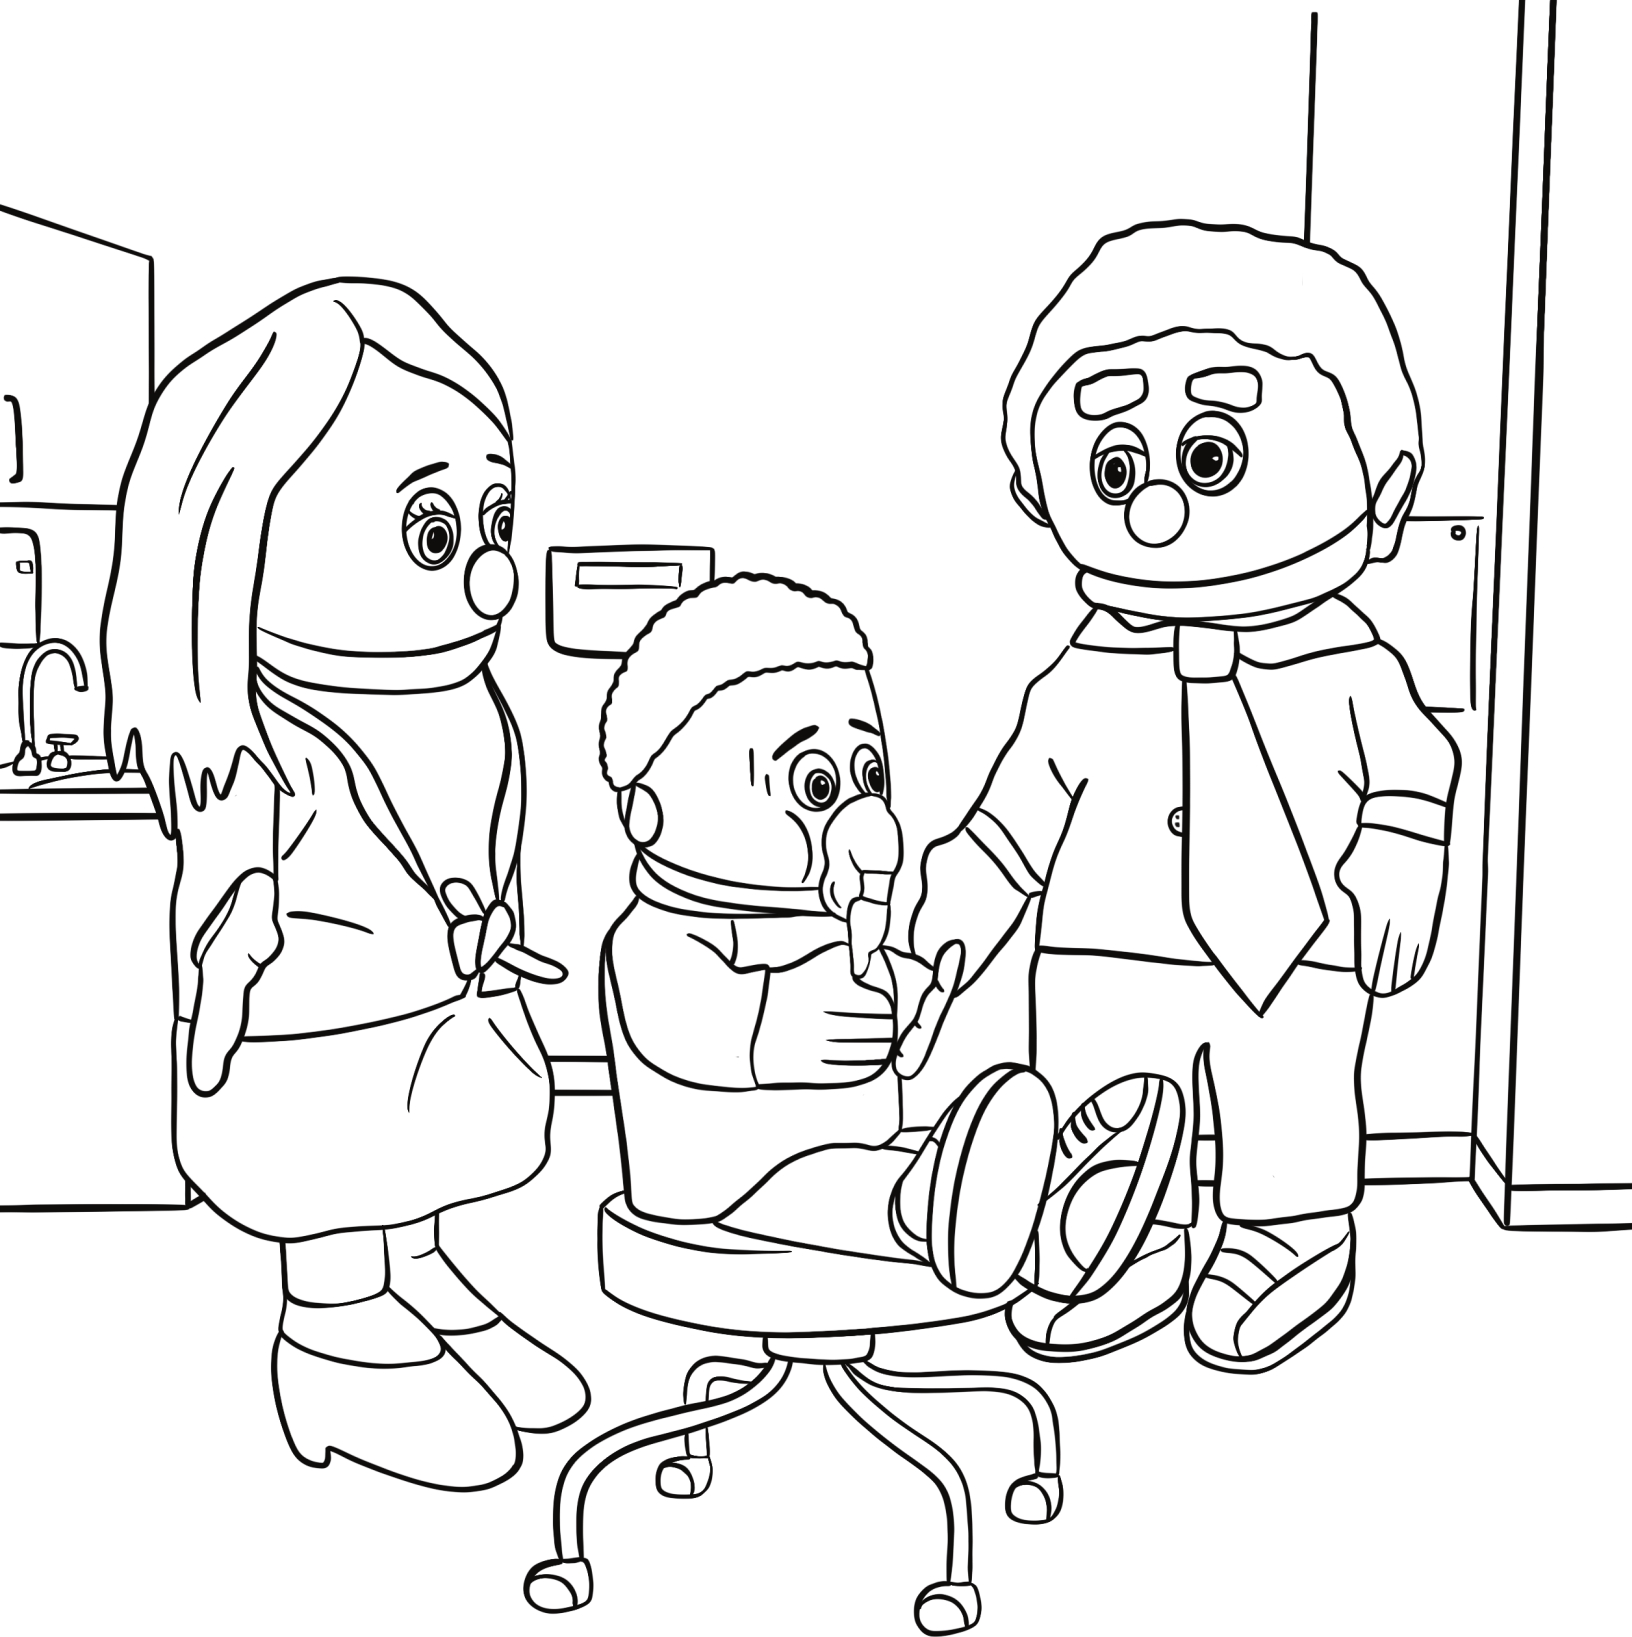

- Diagnoses and treats sick people and prescribes medicines.
- Does some of the same kinds of things as doctors.

### **SOCIAL WORKER**

- Makes sure patients in the hospital understand what's going on and helps them feel more comfortable.

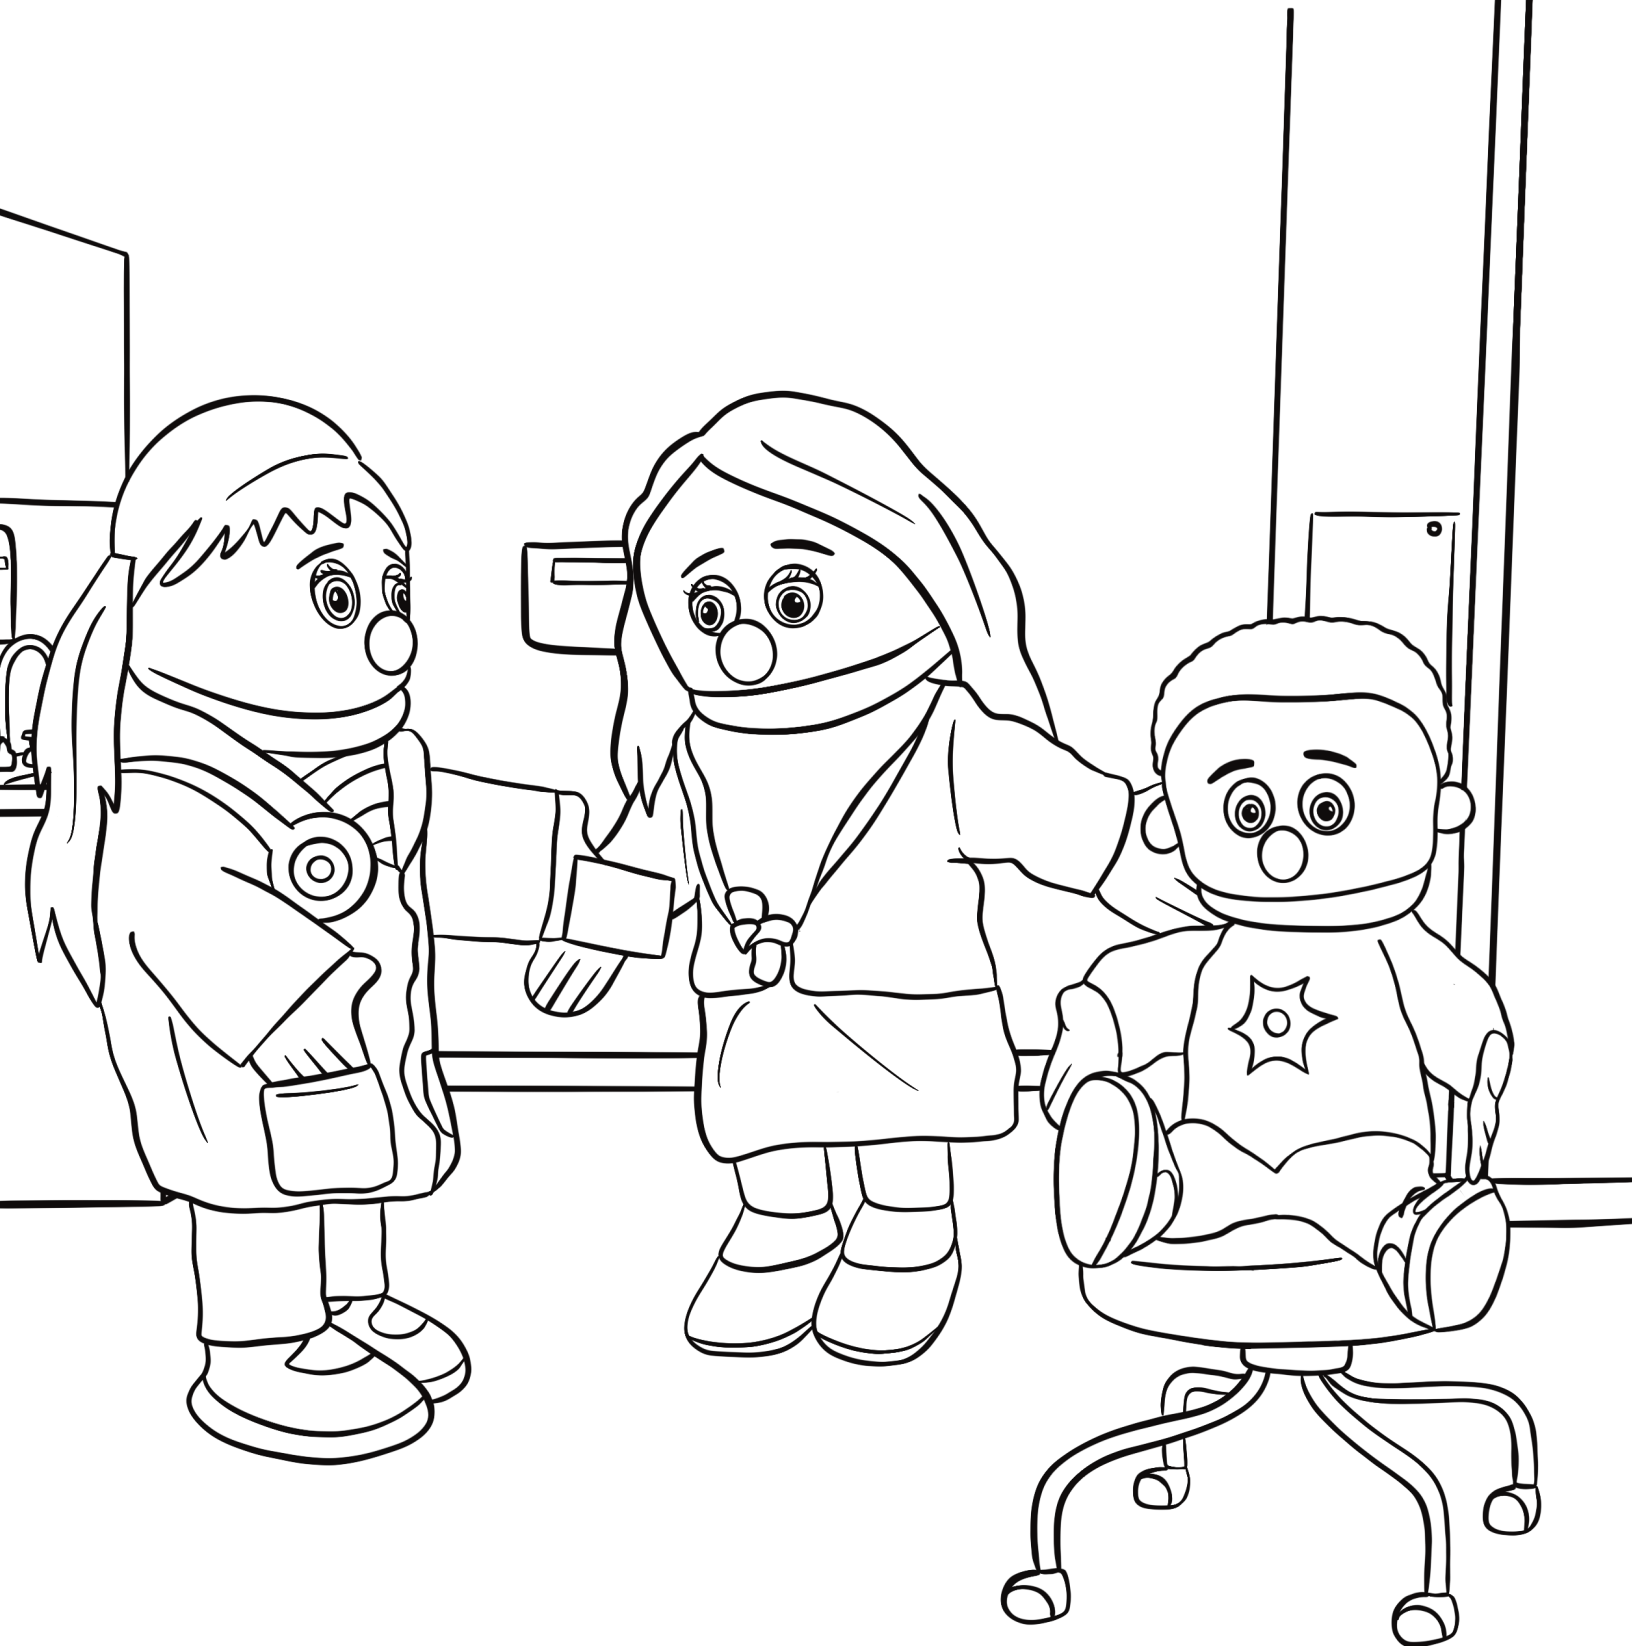

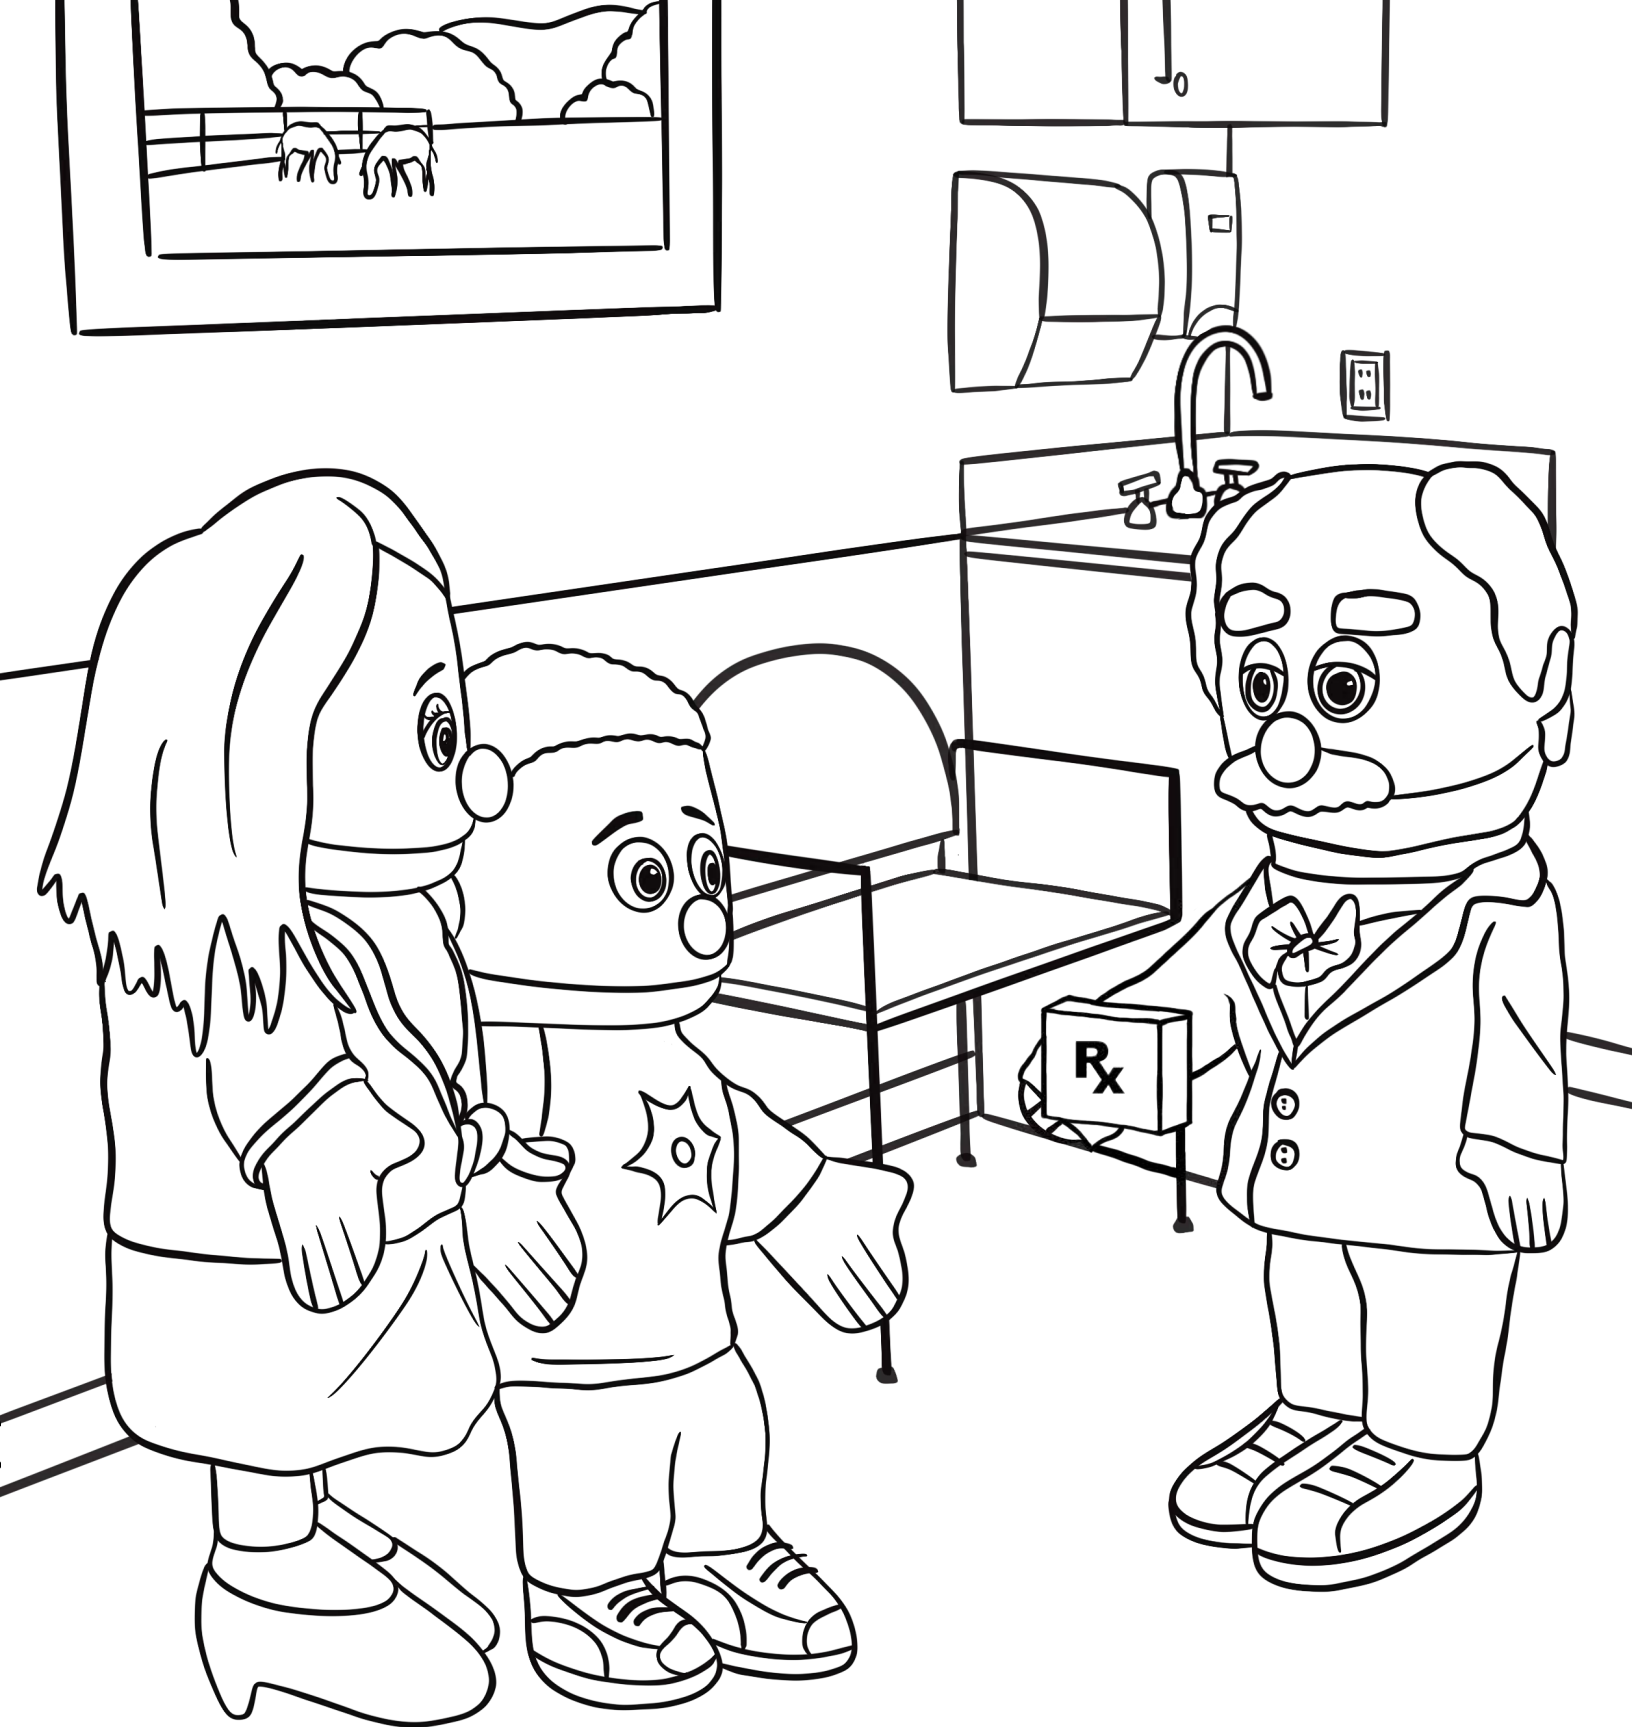

The respiratory therapist gives James a breathing treatment.

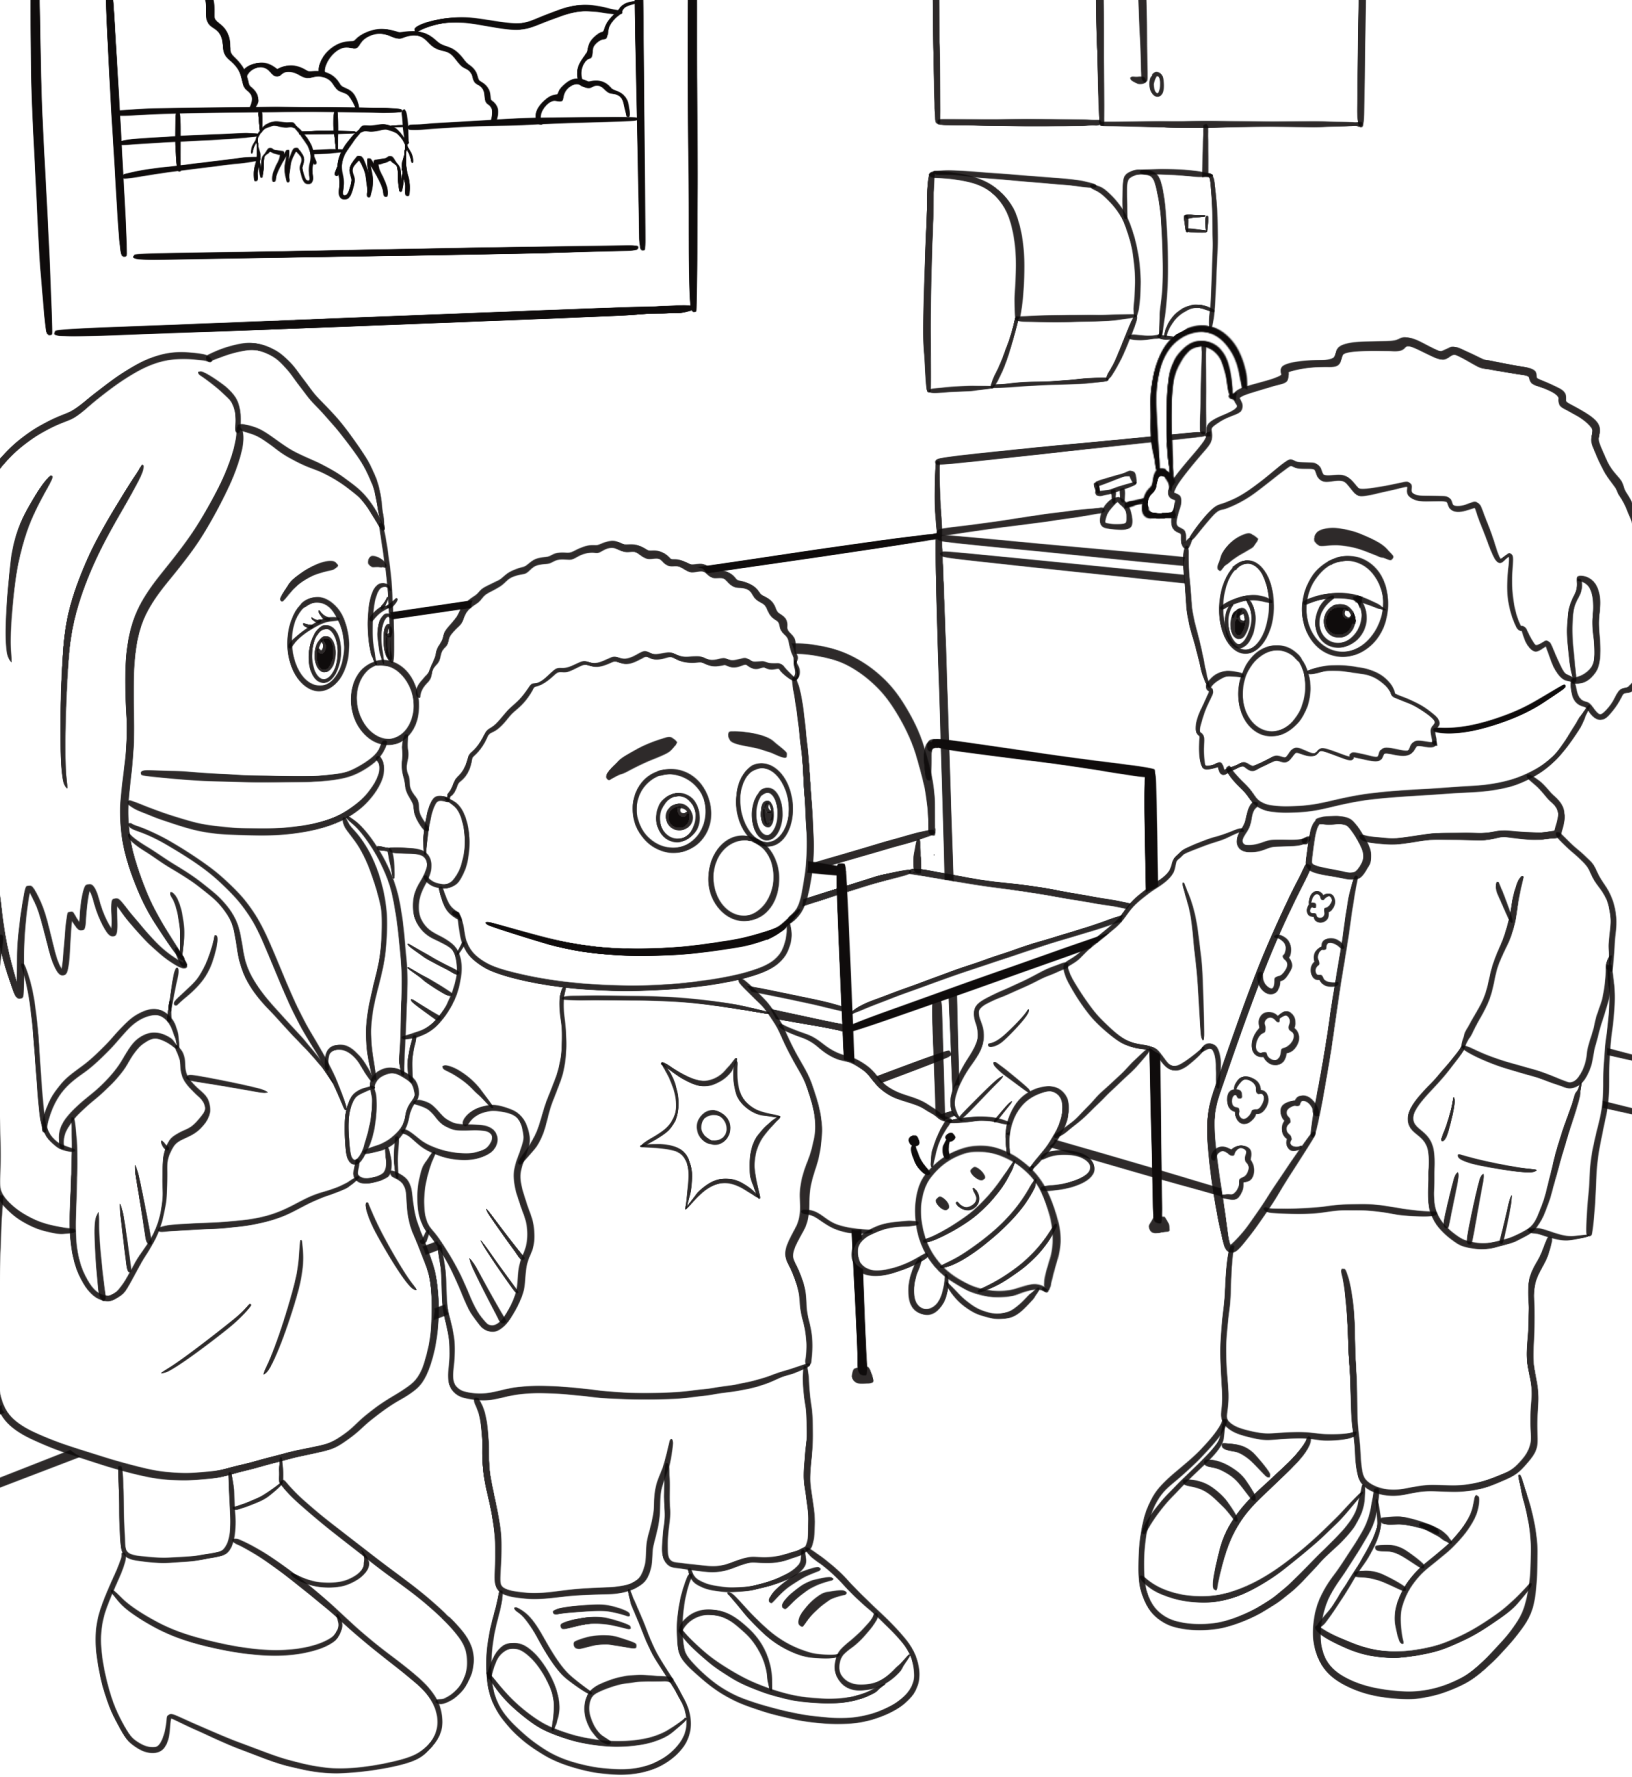

Then the advanced practice registered nurse prescribes allergy medicine for James.

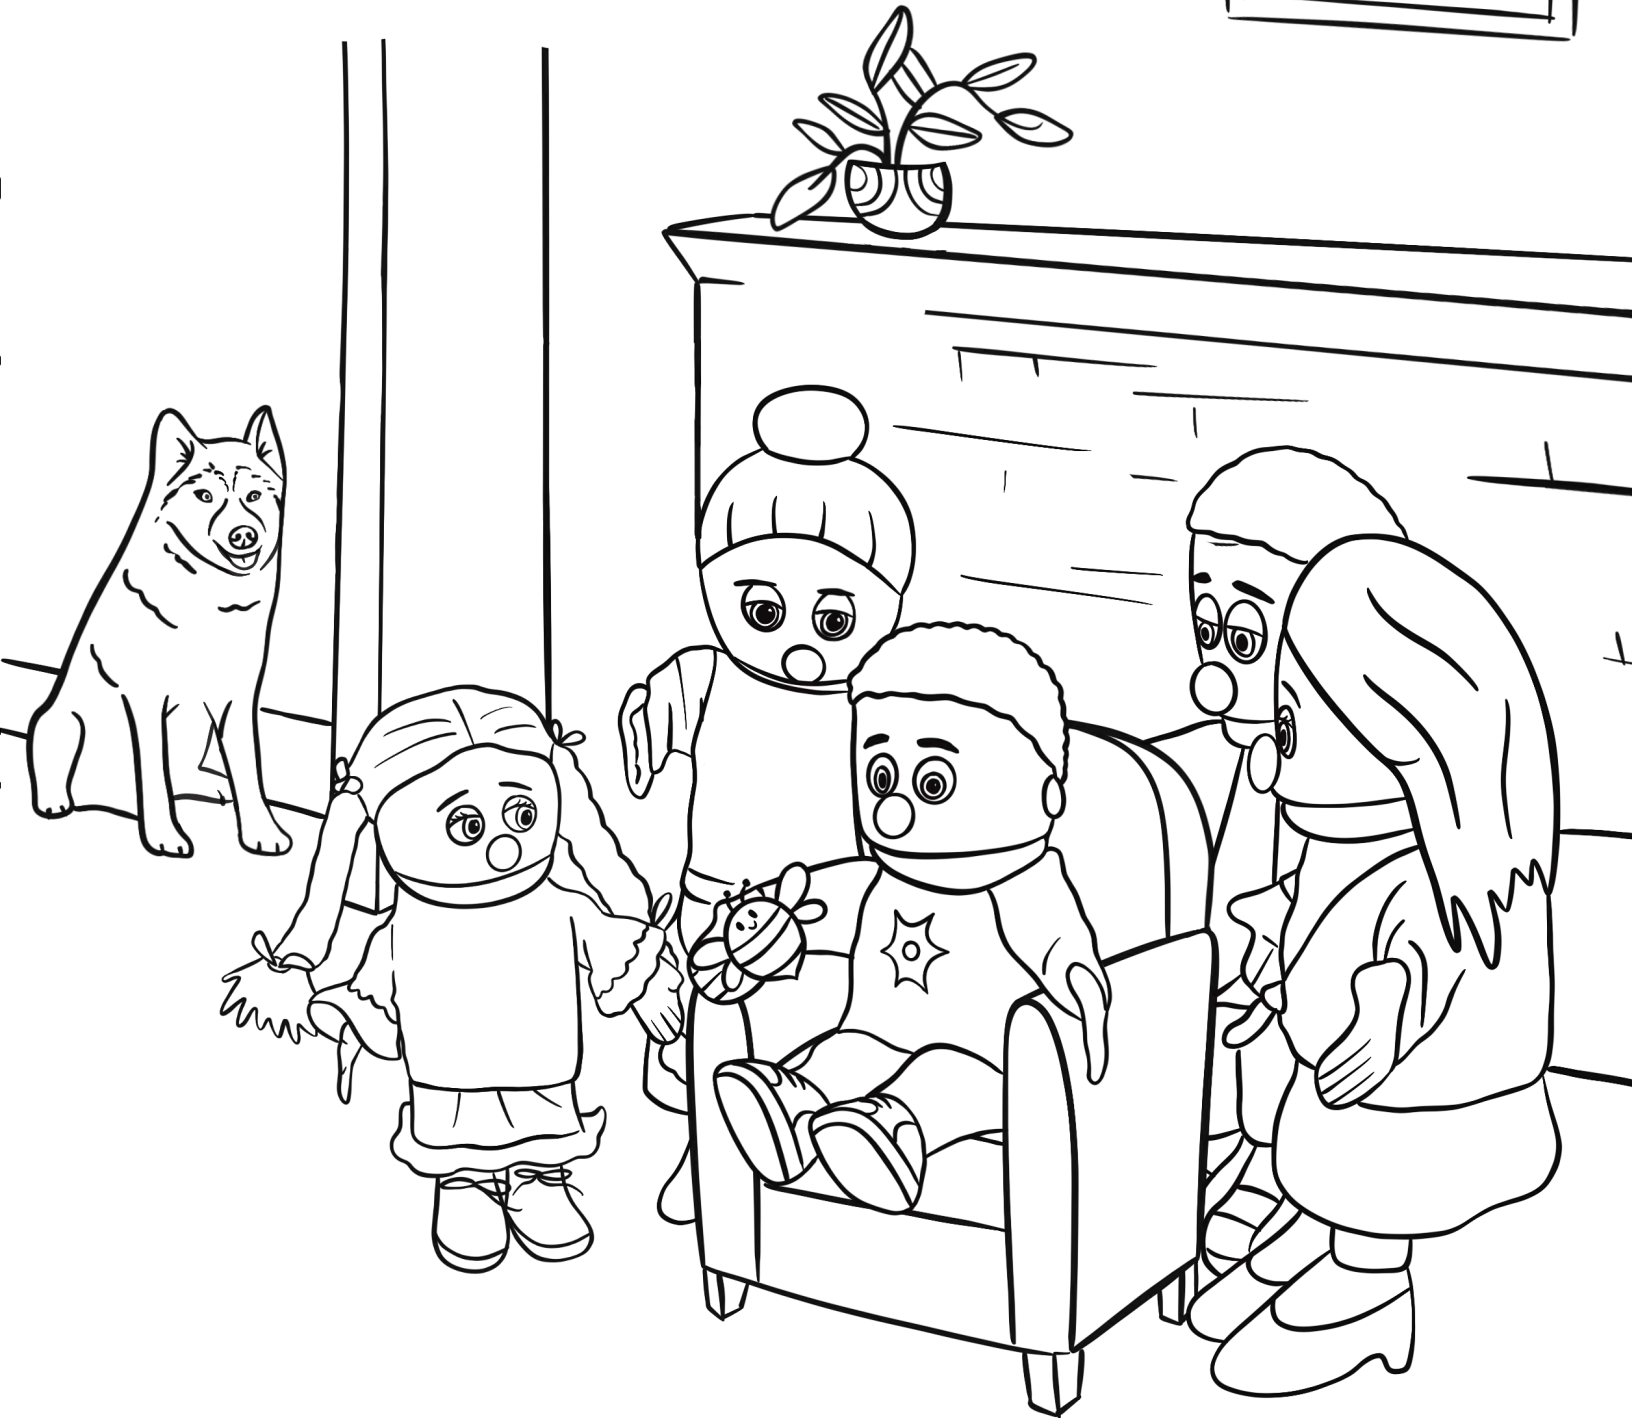

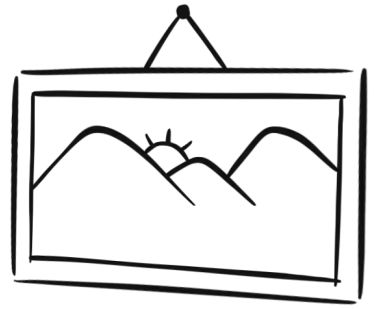

The pharmacist teaches him about the new allergy medicine in case he gets stung again.

Before he goes home, the social worker stops by James's room with a present.  
It's a stuffed bee!

James is resting and doesn't look puffy anymore.  
Mom says, "I'm glad the emergency room team was so helpful."  
James holds up the stuffed bee. "And I got a cool present, too!"  
Jade laughs and says, "And this bee will never sting you!"

Dad says, "With everything going on, I never found out how you got stung."  
James suddenly remembers. "Winston ran outside.  
I was chasing him to bring him back in the house."  
James laughs and says, "Come here, Winston! You're in big trouble now."

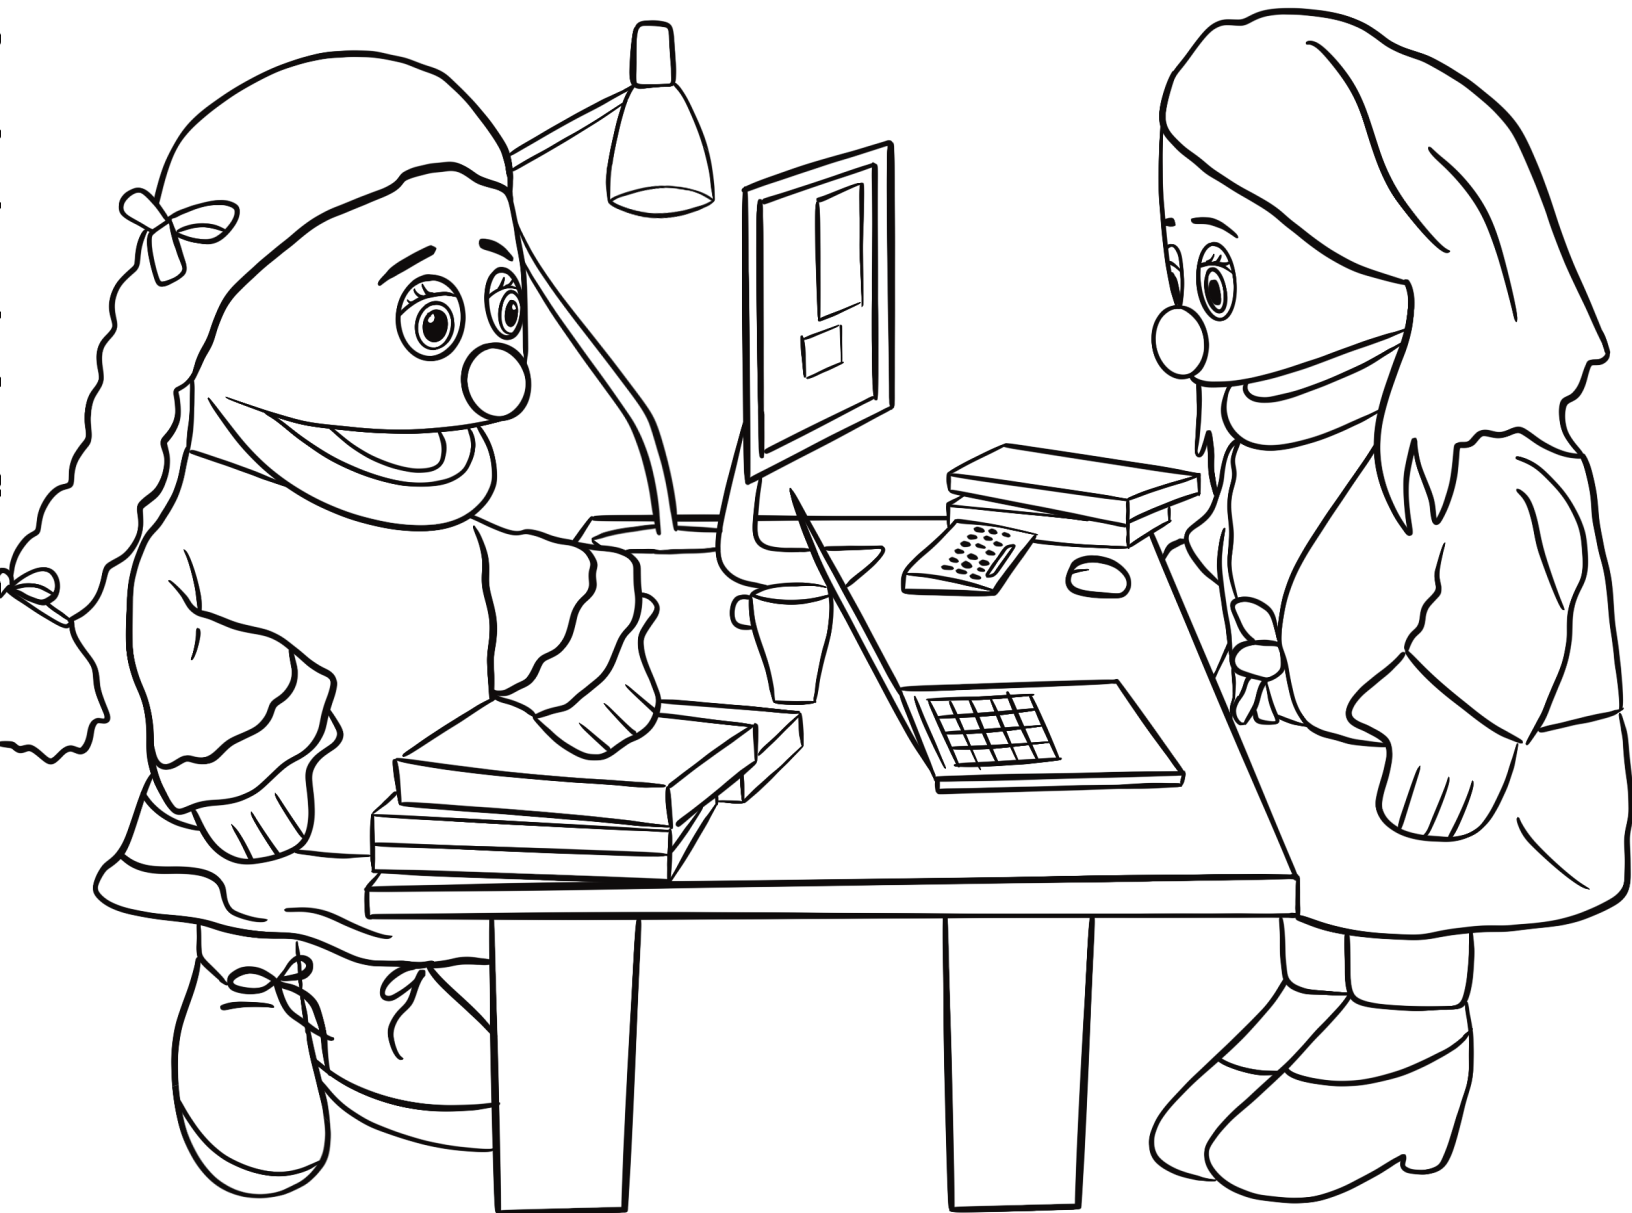

**WAIT! WHERE'S WINSTON?**

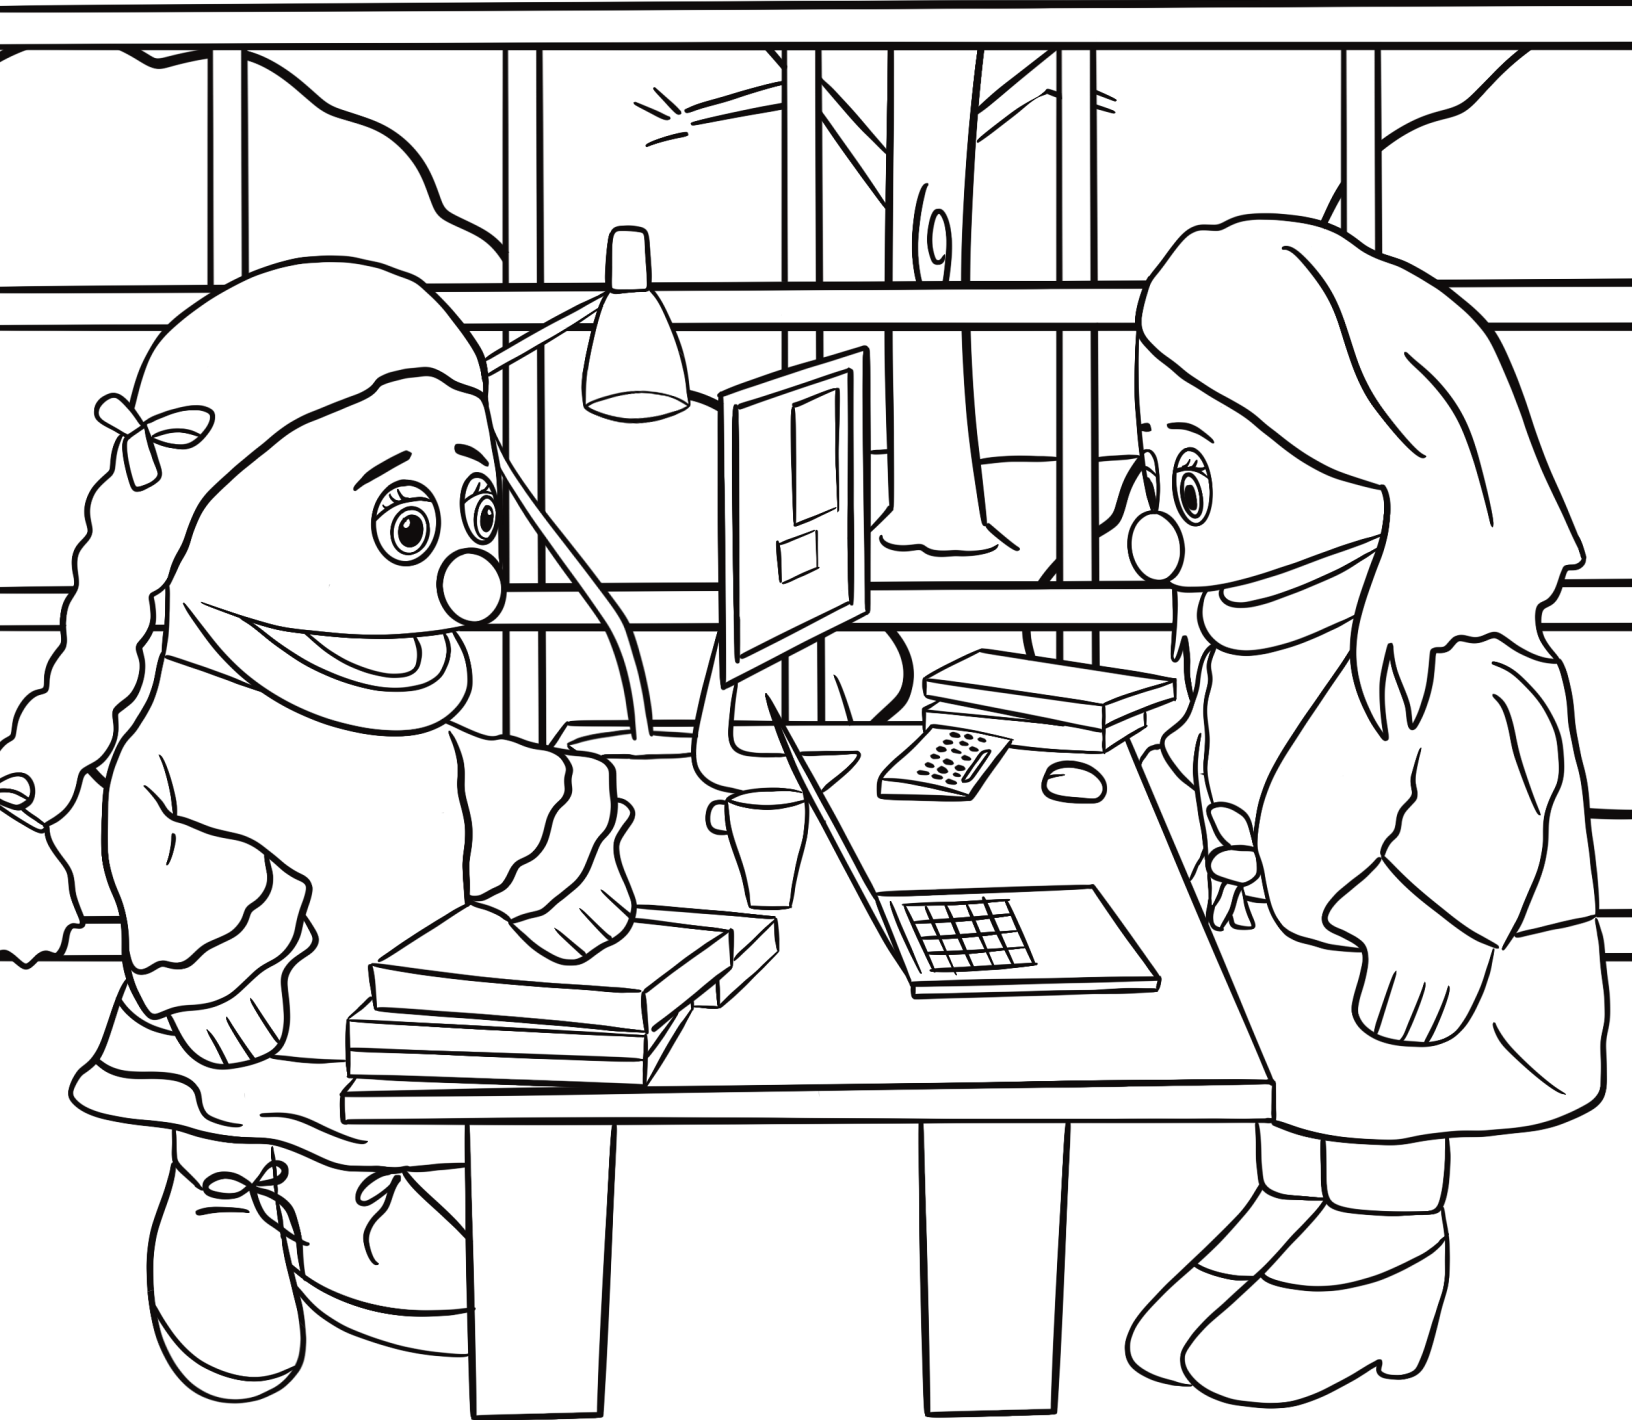

# CHAPTER 3

Oh, no! Winston takes Jade's health form!

When Winston gets bored, watch out! He starts snooping and meddling and playing with anything he can find. Winston always takes things he shouldn't!

Mom is in her home office when Jade comes in and reminds Mom that she needs the doctor's health form for her class trip tomorrow.

Mom points to her desk and says, "It's right here."

But then she sees it's not there ... OH NO!

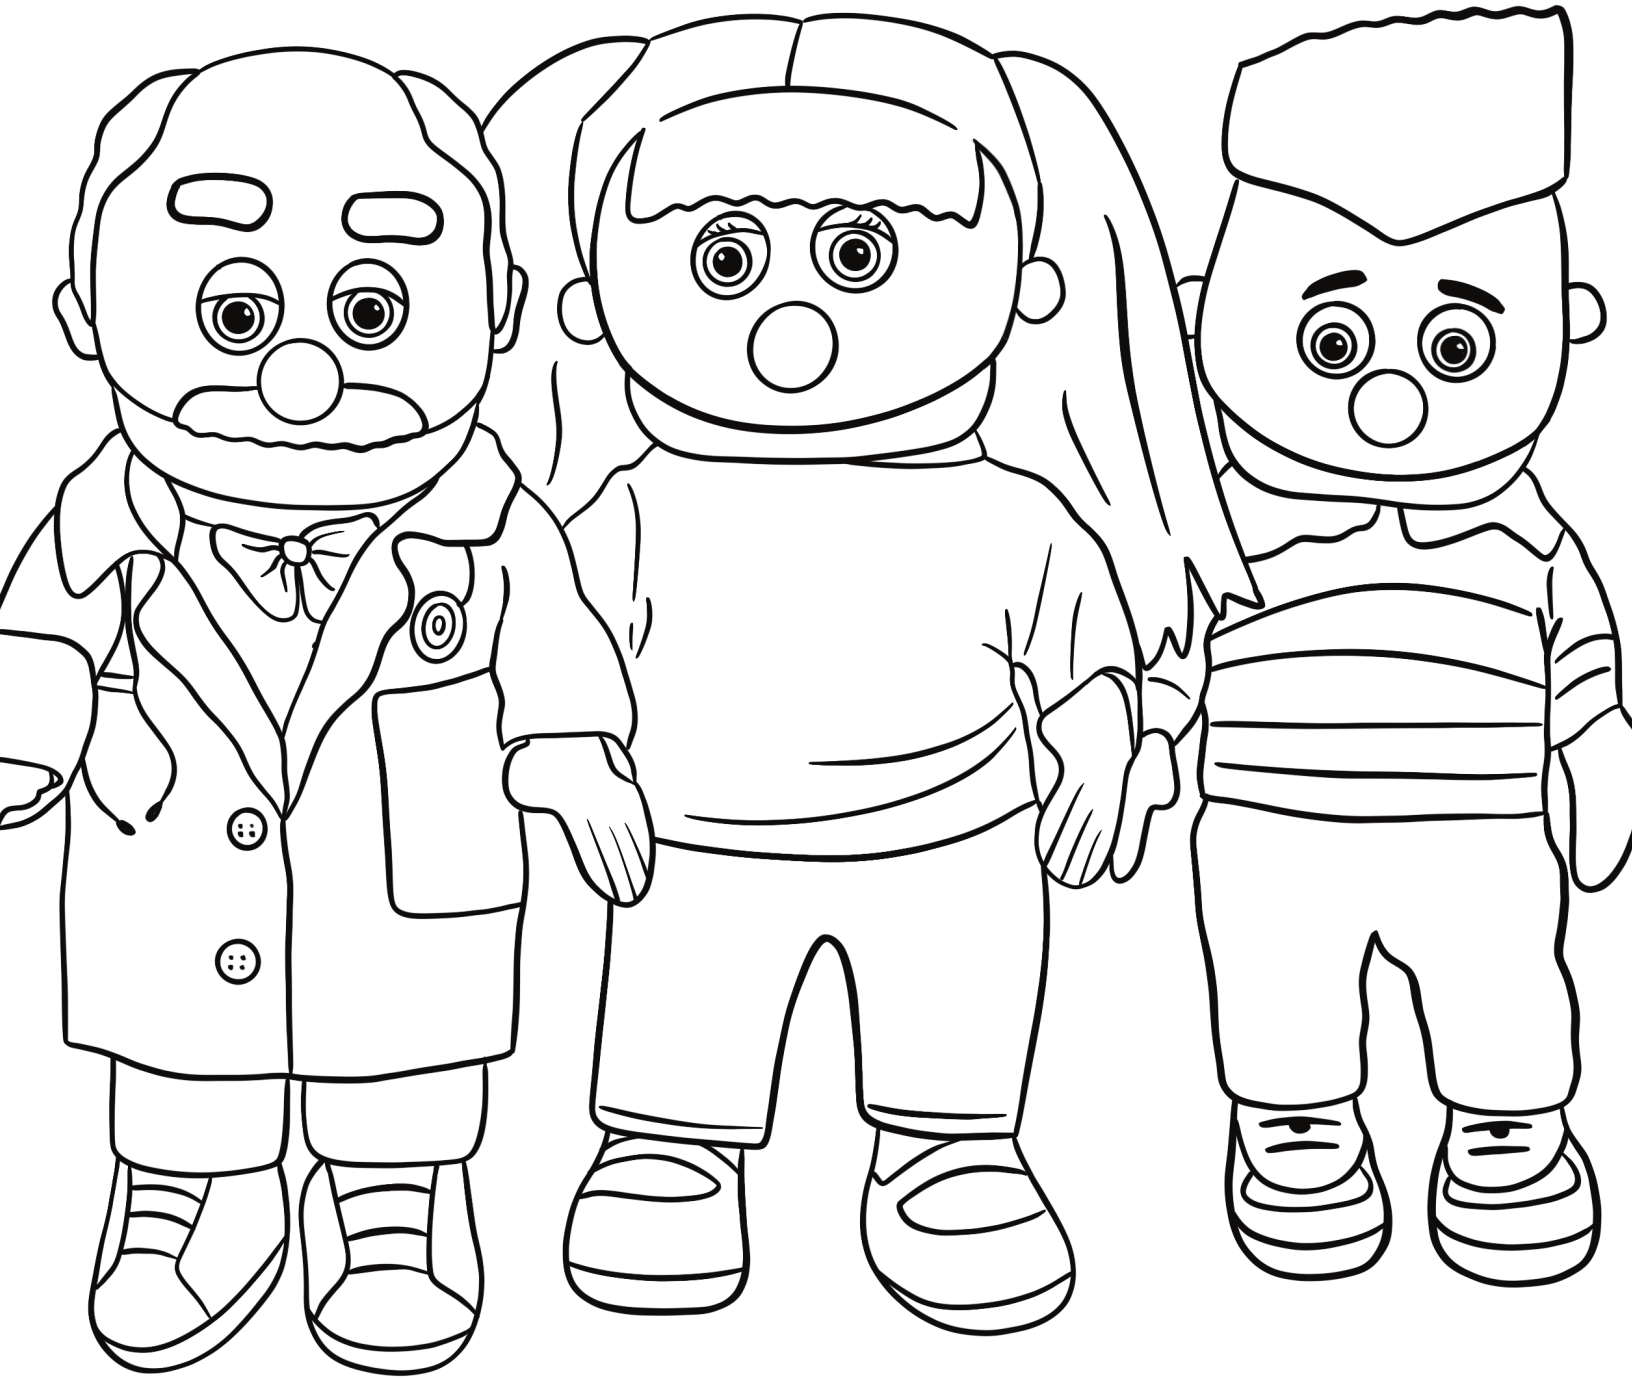

The health form is lost and now Jade won't be able to go on the class trip!

**And there's the doctor's health form. Winston not only took it, he also chewed it!**

This is the team that helps patients like Jade in the pediatrician's office.

### **PEDIATRICIAN**

- A specially trained doctor who helps children when they're sick.
- Checks kids who are going on class trips and signs their health forms.

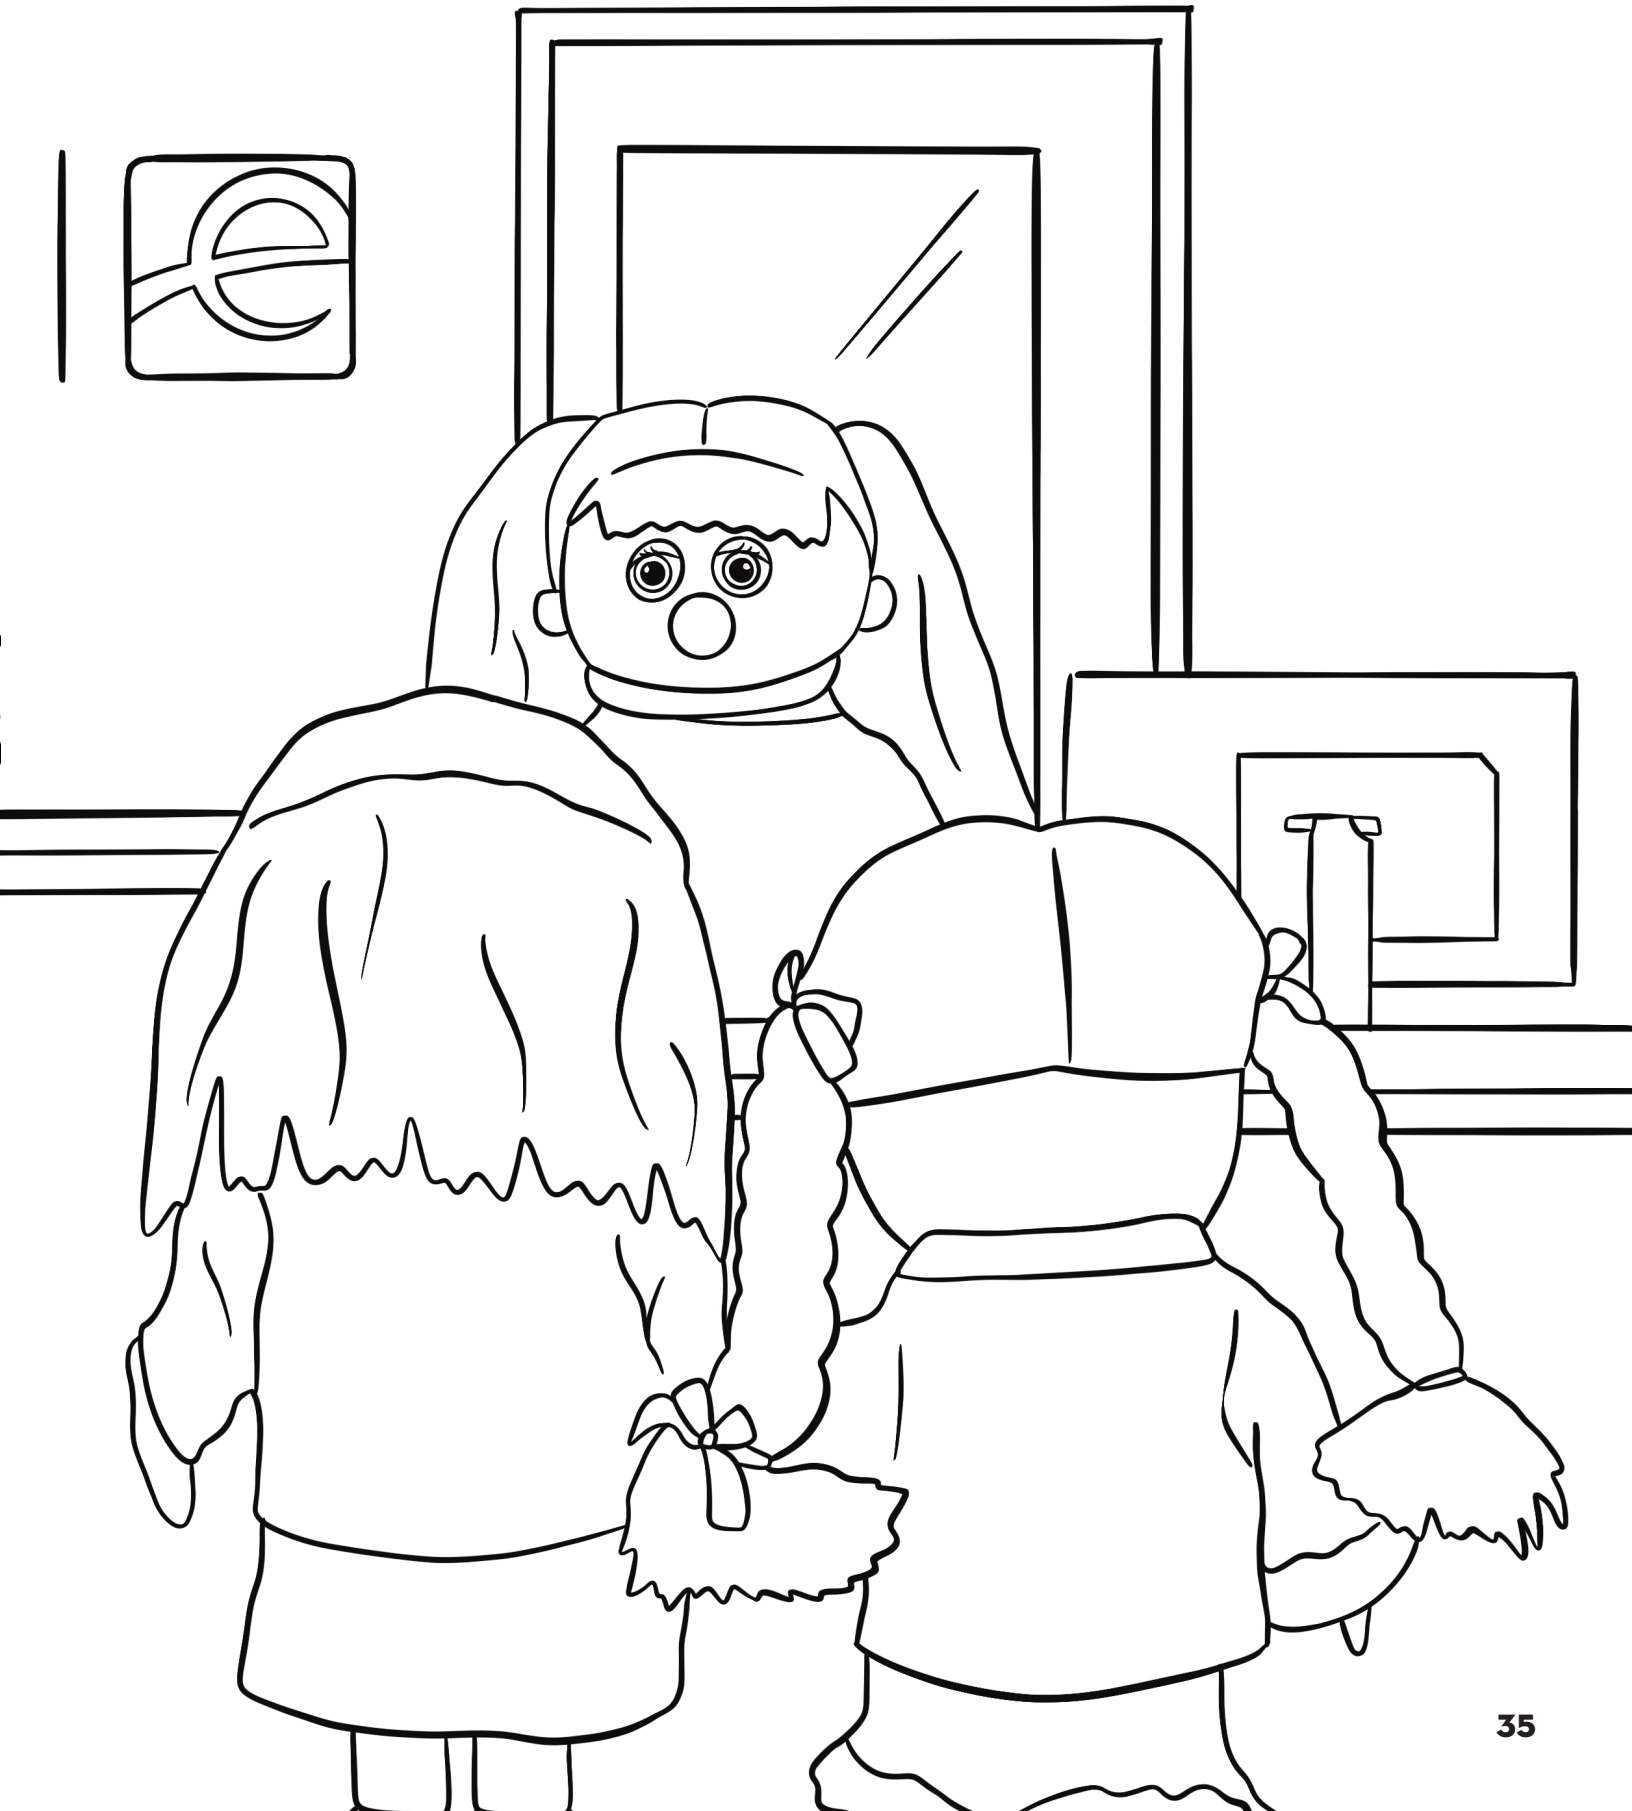

### **RECEPTIONIST**

- Greets patients and their caregivers and gets them signed in.
- Finds out what they need so they can talk to the right person.

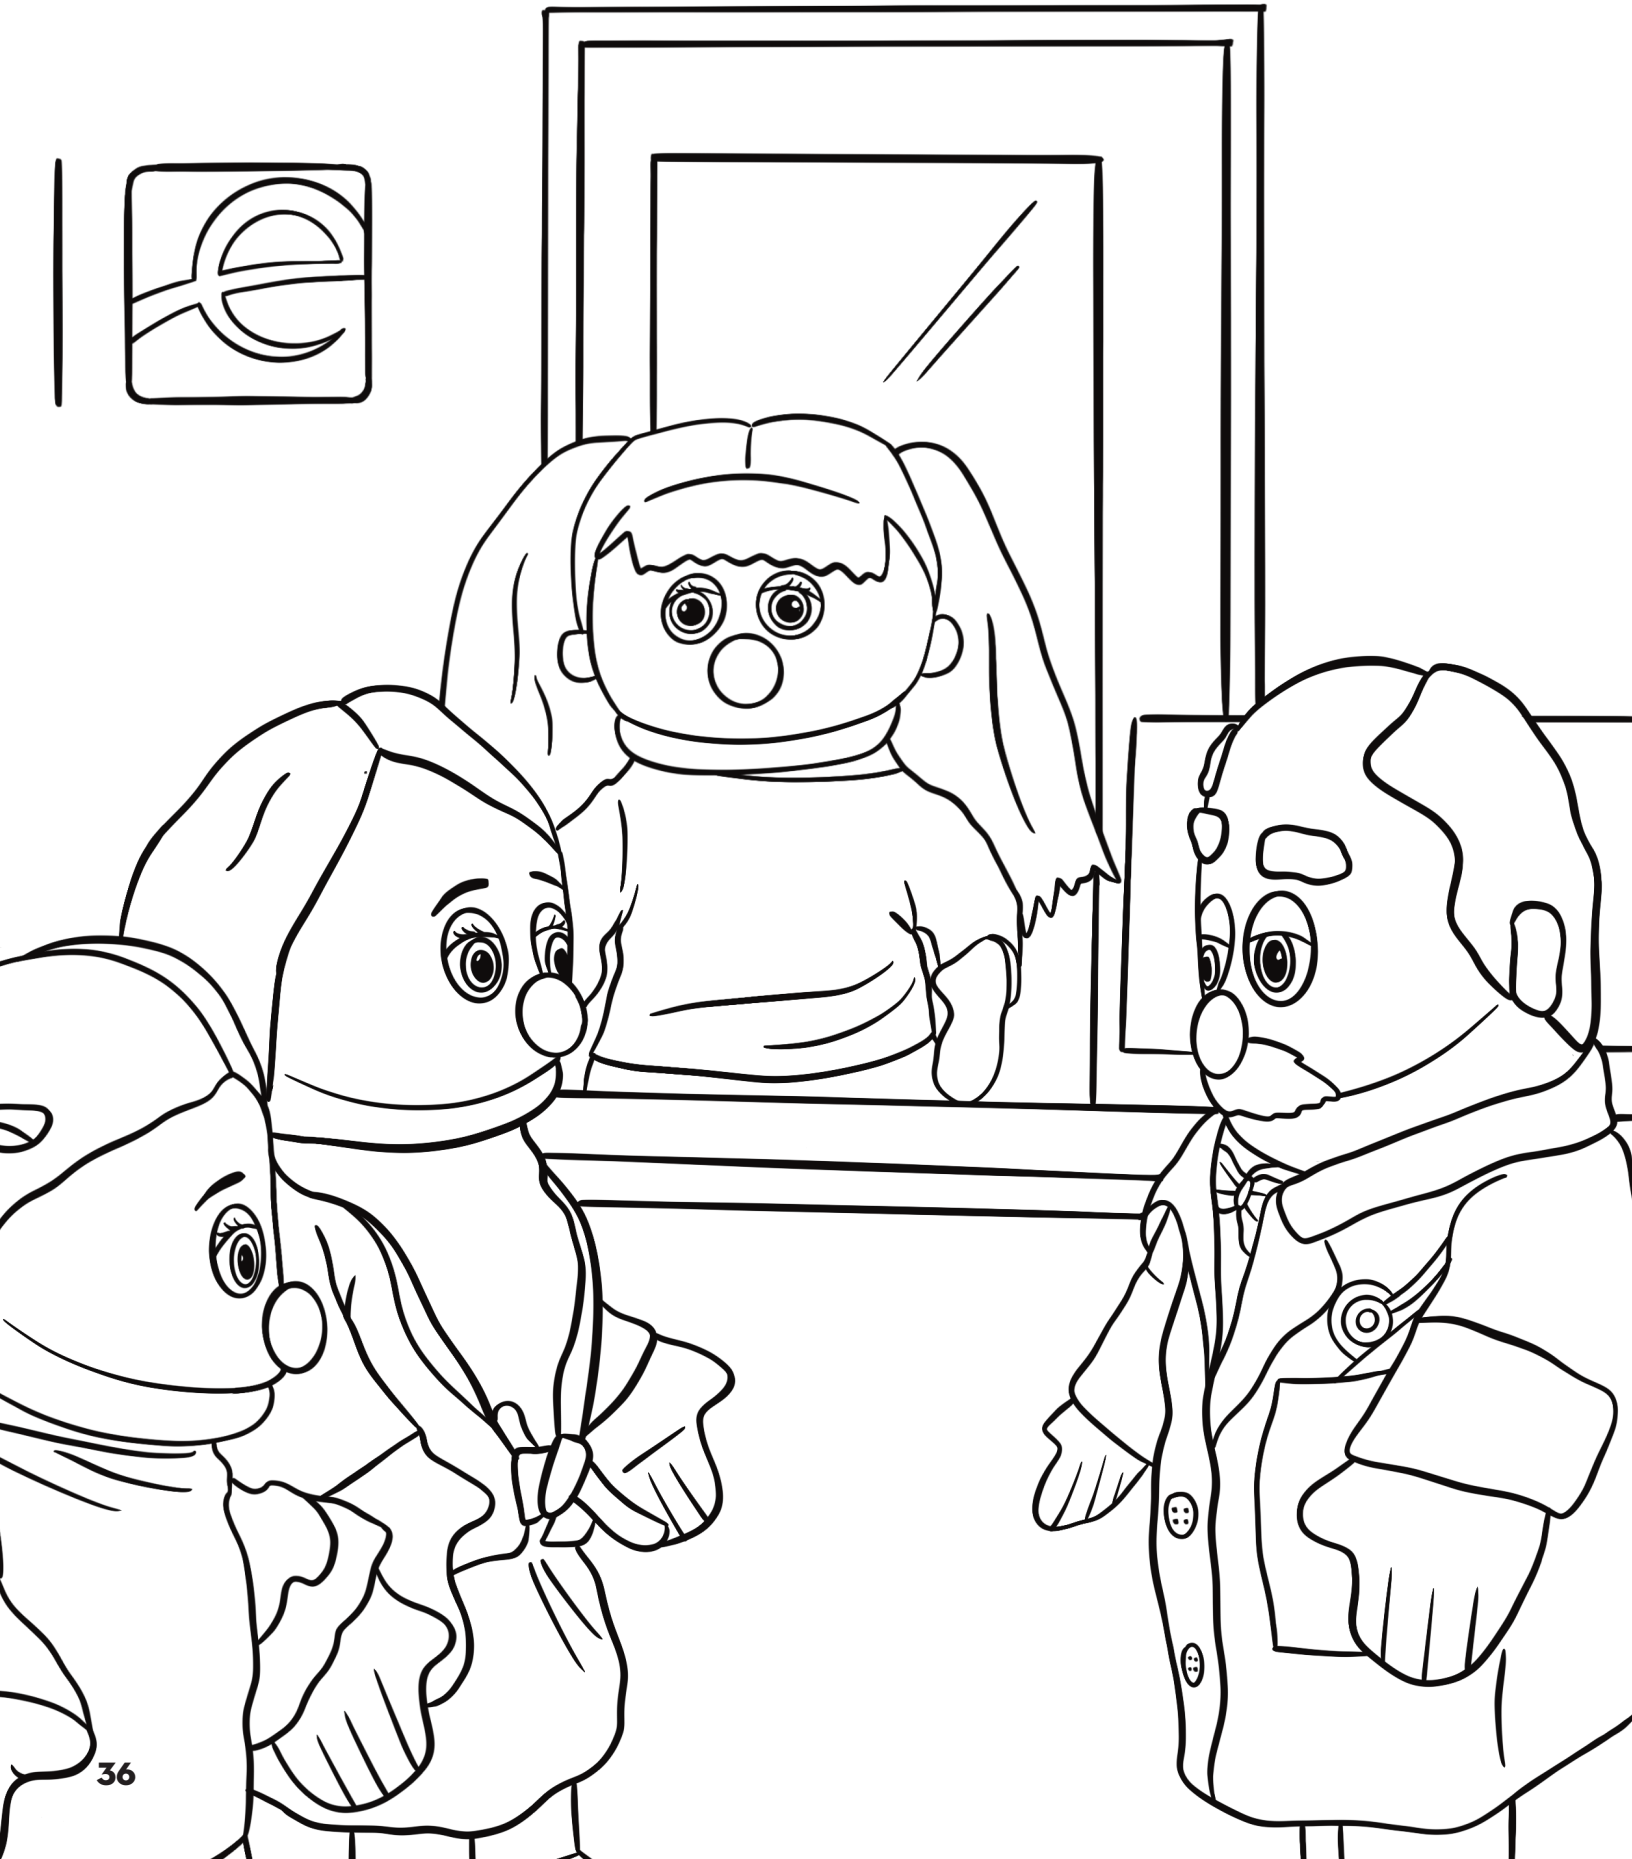

### **MEDICAL ASSISTANT**

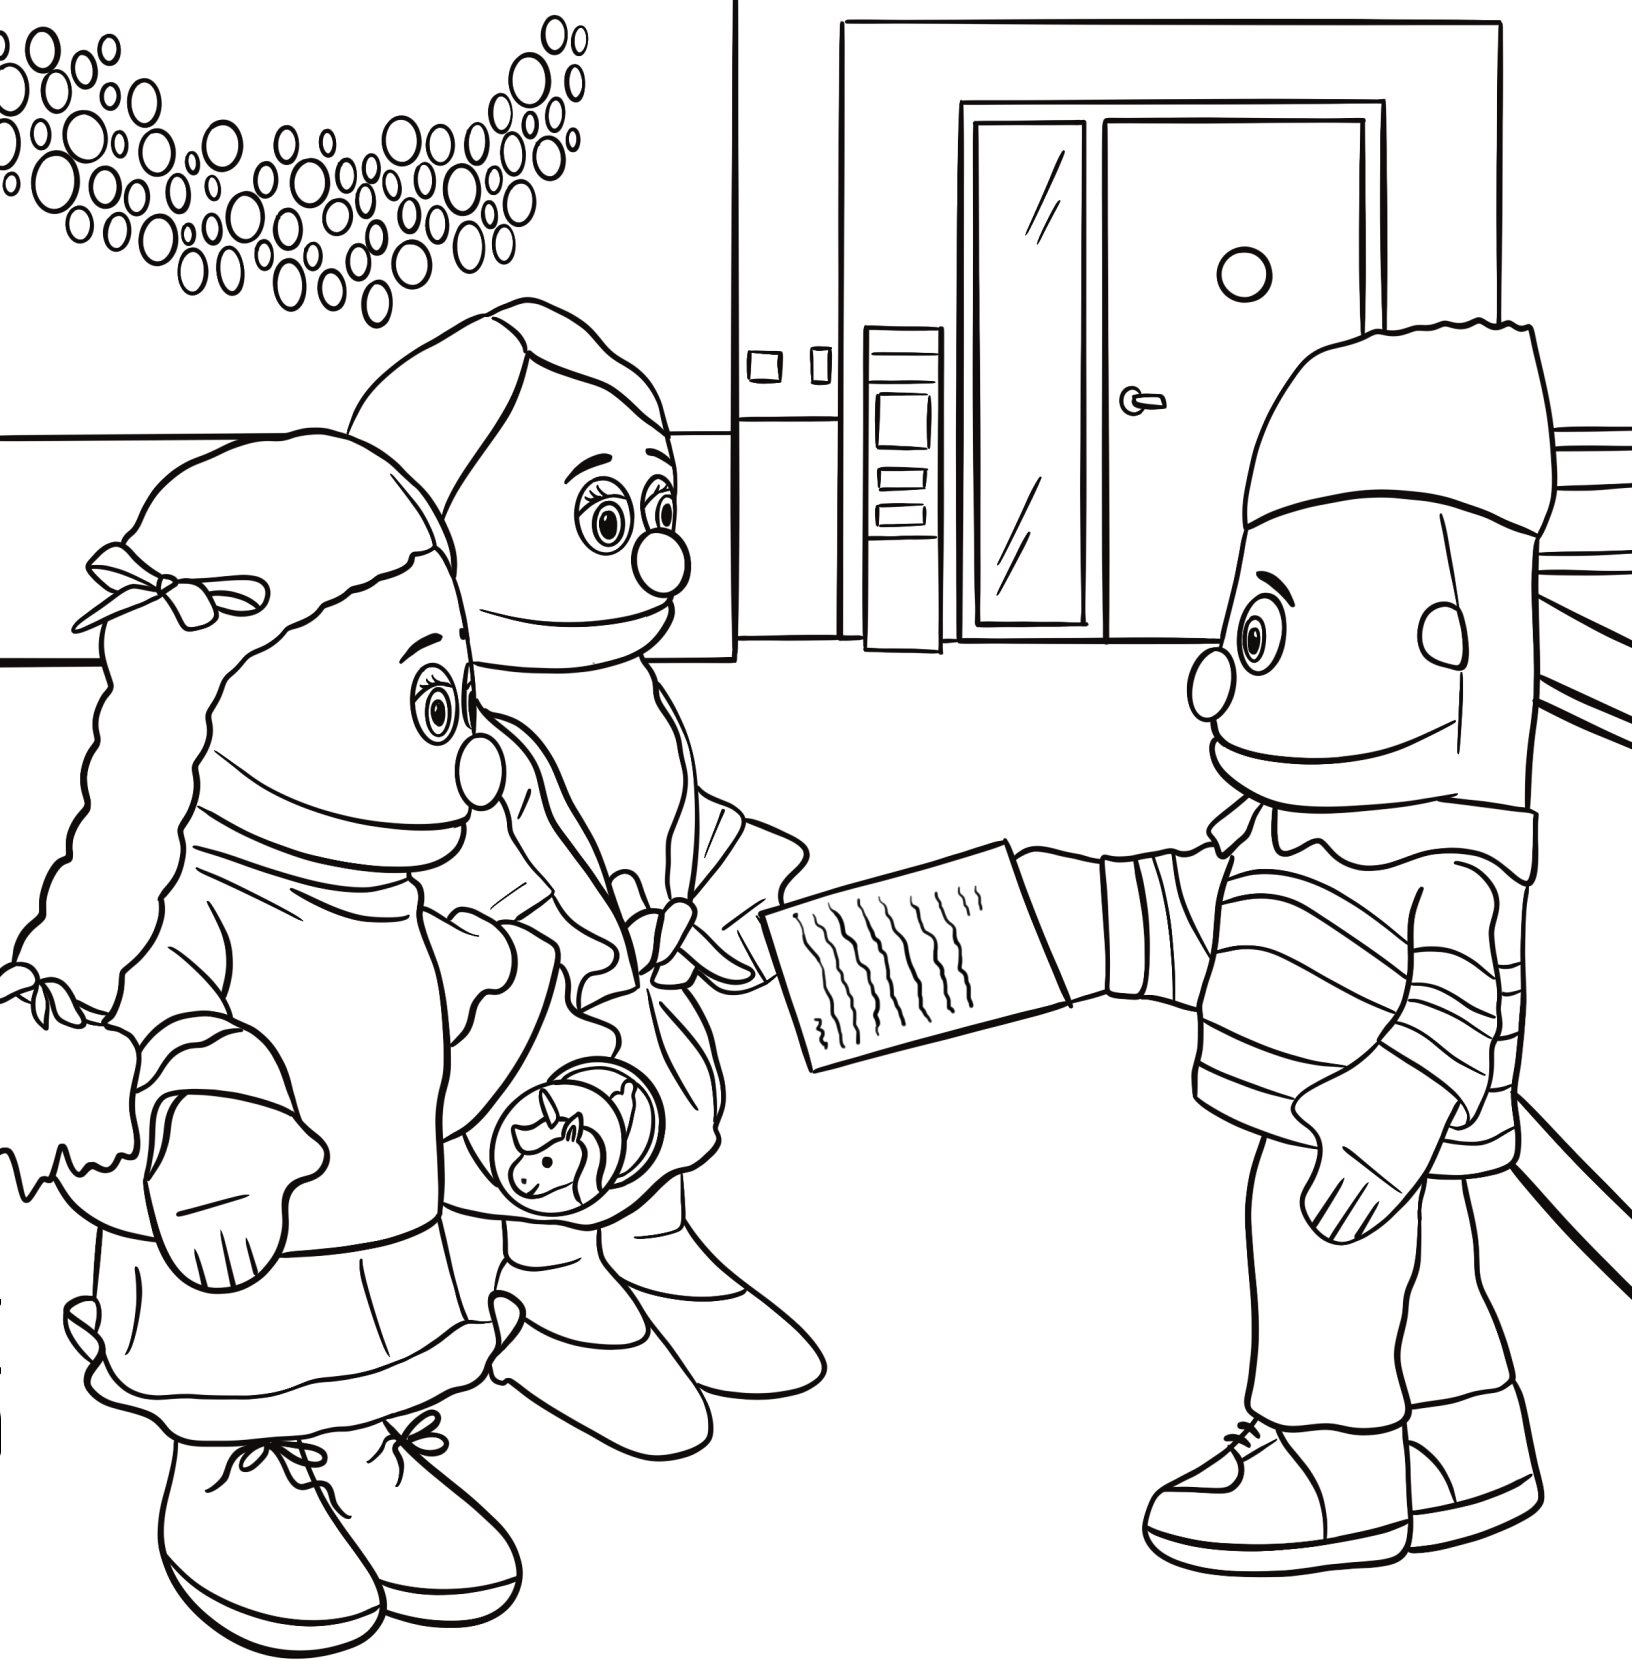

- Supports the doctor and staff.
- Helps solve problems for patients.

The receptionist greets Jade and Mom and finds out what they need.

Then the pediatrician stops by to say hello and let them know she will sign a new form.

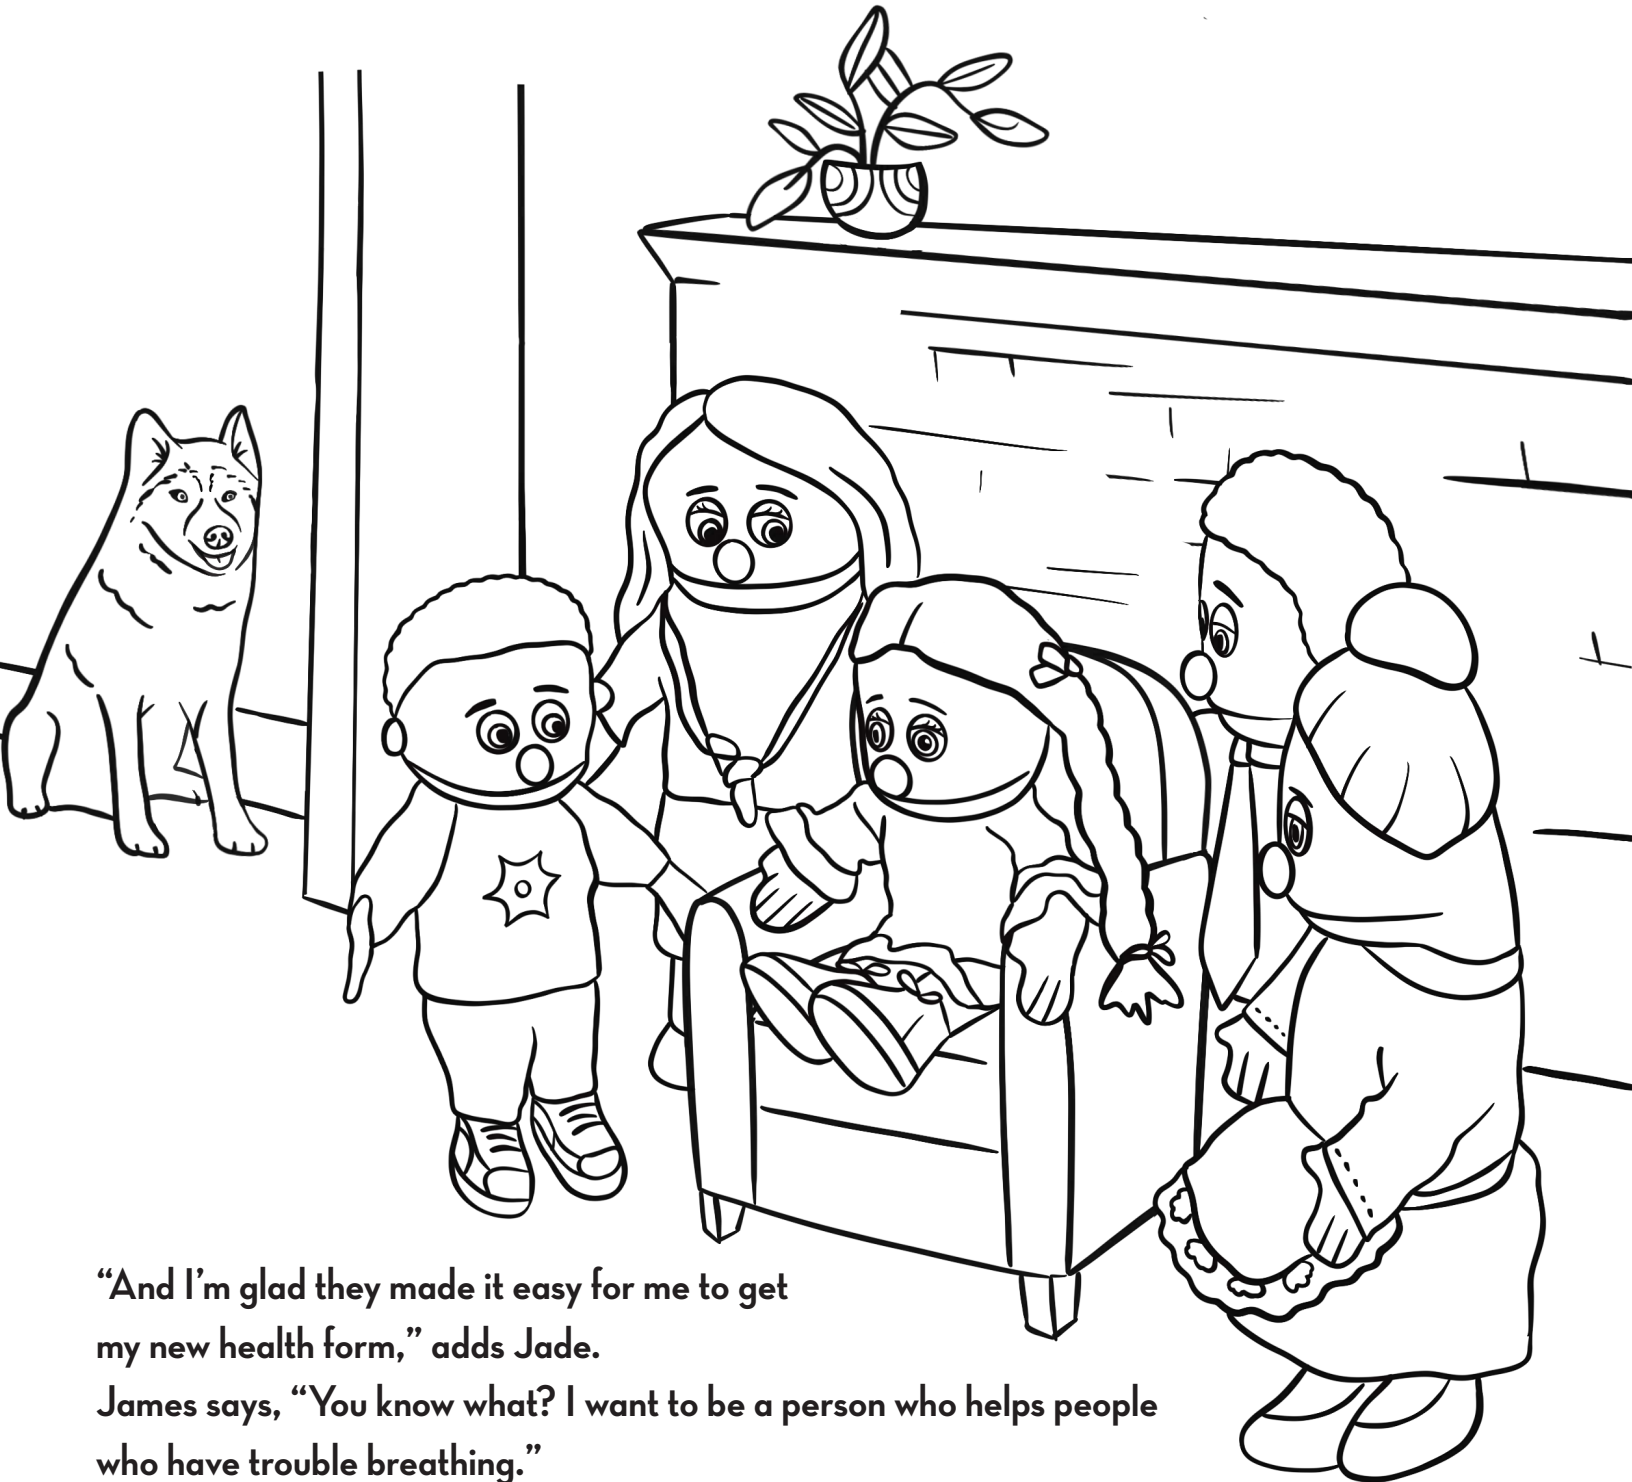

The medical assistant gets the new form ready,  
has the doctor sign it and gives it Jade.  
Before they leave, the receptionist gives Jade **two stickers**:  
one for her and one for her brother.

“Goodness,” says Mom, “it’s been a busy time with urgent care, the emergency room and the doctors’ offices. They were all so helpful, too!”  
James looks up from his puzzle and says, “That’s right! Nobody can tell I got stung by a bee.”  
Grandma says, “And my wrist is healing very nicely. I don’t even need a splint now!”

“And I’m glad they made it easy for me to get my new health form,” adds Jade.

James says, “You know what? I want to be a person who helps people who have trouble breathing.”

Then Jade says, “And I want to be a doctor for kids, like the one we have now.”

Dad laughs and says, “Even though Winston was the reason we had so many healthcare visits, we all learned something.” He calls out, “Winston, where are you? Stop hiding!”

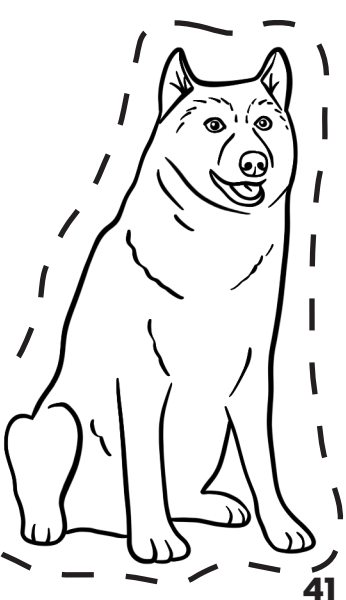

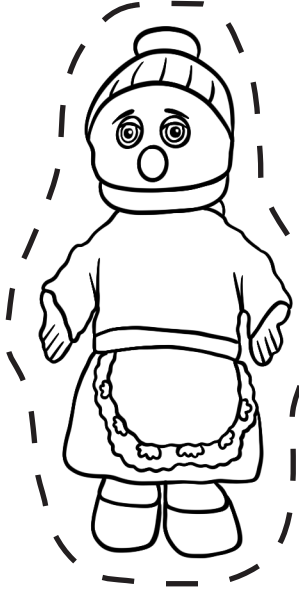

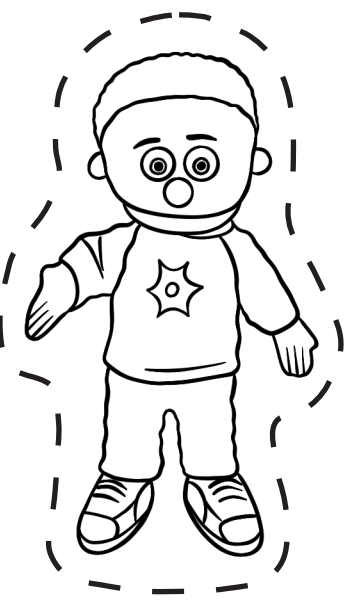

**“WOW!  
THERE’S  
WINSTON!”**

## MATCH THE HEALTHCARE CAREERS

Read what these healthcare workers do, and then fill in the blank with the name of the career.

1. Gets the patient's health information and checks vital signs.      R
2. Knows all about bones, joints and muscles that help people move.  
      T     E          O     R
3. Asks patients where their body hurts and decides on the best treatment.  
      H          I          S          T
4. Helps people who are having trouble breathing.  
      P     R          Y          H          S
